

INTRODUCTION

This is the Devon Joint Strategic Needs Assessment for the Teignmouth area, which also encompasses the surrounding rural parishes.

The aim of the Joint Strategic Needs Assessment is to collaboratively identify current and future health and well being needs and inform future service planning and delivery. The purpose of this town profile is to provide a detailed assessment of current need and service activity at a local level. This profile looks at the health and social care needs of the town and its rural surroundings and other smaller surrounding settlements.

Data for this report was gathered and collated by the NHS Devon information teams, and the Devon County Council Adult and Community Service and Children and Young Peoples Service and Strategic Intelligence teams.

A glossary is available providing detailed definitions and background information for the measures in this report:

http://www.infopoint.devonpct.nhs.uk/Library/Public_Health_Commissioning/JSNA_2009_Glossary_Devon.pdf

FEEDBACK

Any feedback or questions concerning the information in this report would be gratefully received. We would be keen to receive feedback on whether you recognise the community as described in the profile, is any key information is missing or any local priorities or issues you wish to identify.

Please contact d-pc.strategicreview@nhs.net with any comments or questions.

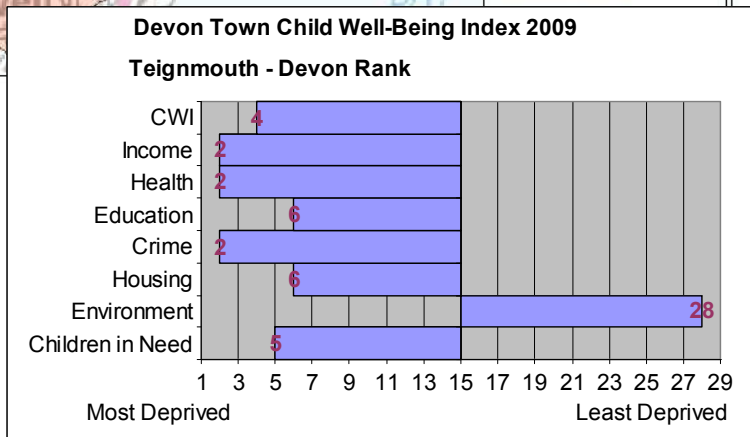

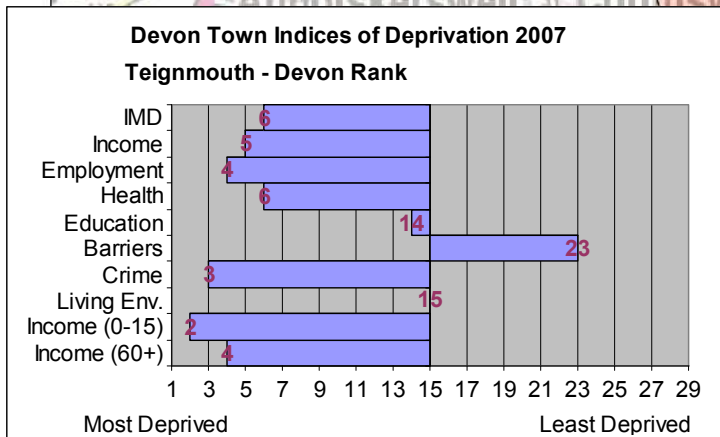

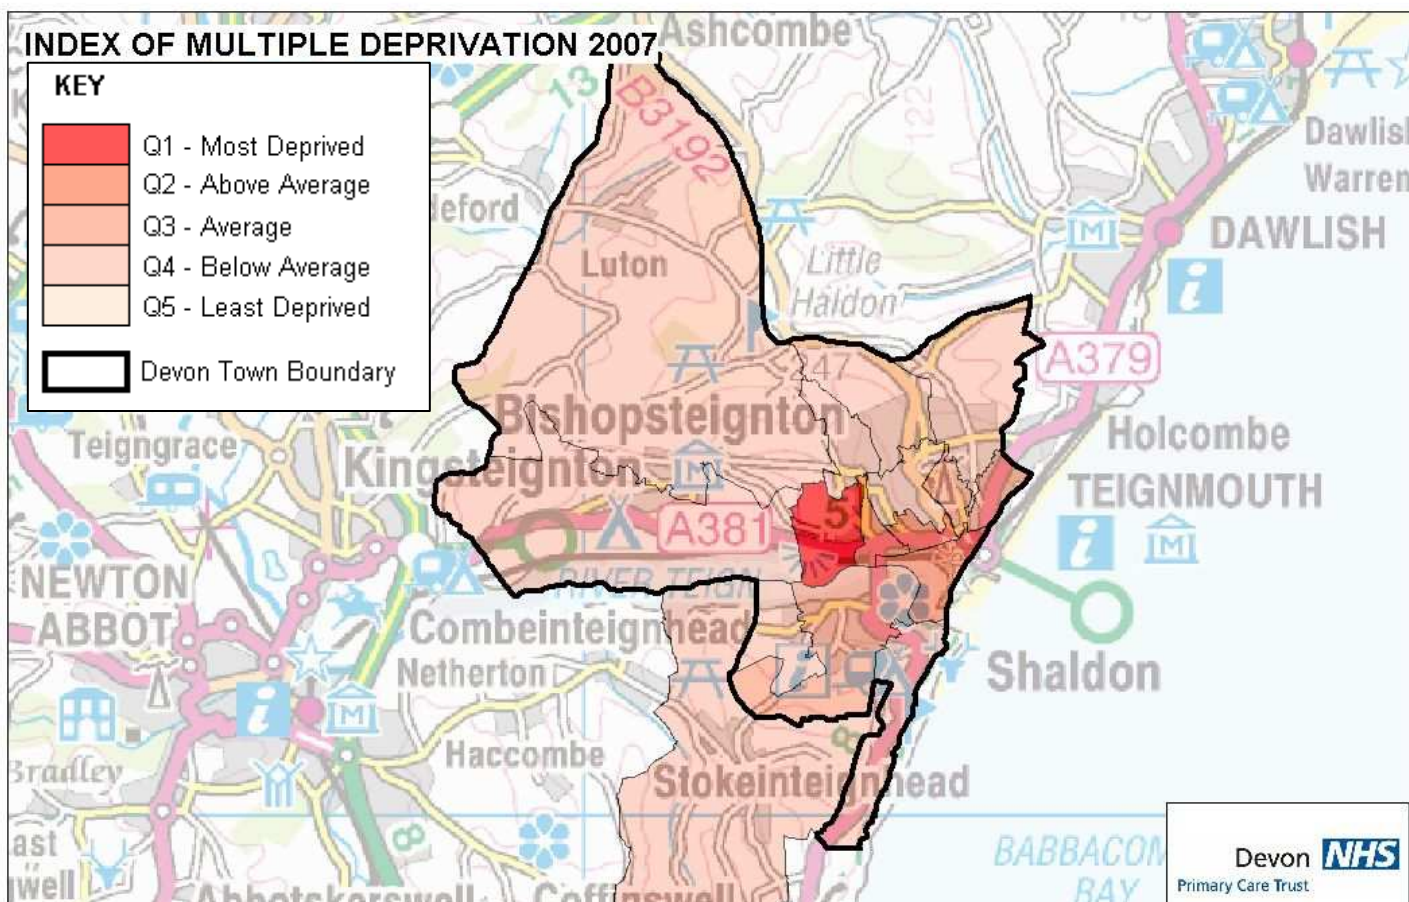

EXECUTIVE SUMMARY

- Deprivation in Teignmouth is above the Devon average, with particular issues around income, crime and employment. The rural area around the town is much less deprived.
- The population of Teignmouth is predicted to increase by 2,342 people between 2006 and 2021 – a rise of 12.2%. The largest change is predicted to be in the 70 to 74 age group with an increase of 45.5%
- The birth rate is in line with the Devon average, with around 150 births per year.
- Life expectancy is slightly above the Devon average, with longer life expectancy in rural areas.
- The youth offending rate and persistent offending rates are above the Devon average
- GCSE attainment is below the Devon average.
- The rate of referrals for older people aged 65+ into Adult and Community Services in Teignmouth is the 2nd highest referral rate for this age group across Devon (out of 29 Devon towns)
- The rate of older people aged 65+ in Teignmouth receiving assessments through Adult and Community Services is the highest rate for this age group across Devon.
- The rate of Safeguarding alerts for vulnerable adults in Teignbridge is in line with the Devon average
- Outpatient and A&E attendances are typically above the Devon average, whilst elective and non-elective admissions to hospital are below the Devon average. The highest rates are seen in the urban centre.
- The rate of alcohol-related admissions is above the Devon average, and is particularly high in the urban centre.
- The rate of teen conceptions in the Teignmouth West ward is significantly above the Devon average.

DEPRIVATION

The main source of information on deprivation is the 2007 Indices of Deprivation, which combine data on different social issues to produce an overall deprivation score for local areas, the Index of Multiple Deprivation. In the Teignmouth town area the most deprived areas are in the Hospital and Mill Lane areas of the town.

A breakdown of the individual domains from the Indices of Deprivation, reveal particular issues around income deprivation (particularly affecting children), crime and employment. A separate Child Wellbeing Index was released in 2009, which reveals that Teignmouth has one of the highest levels of deprivation affecting children in Devon, with particular issues around income, health, crime and children in need.

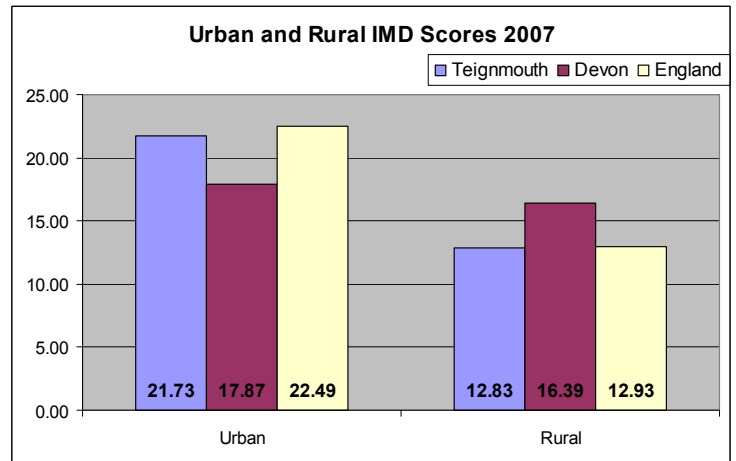

For full description of domains please view the glossary

DEPRIVATION IN URBAN AND RURAL AREAS

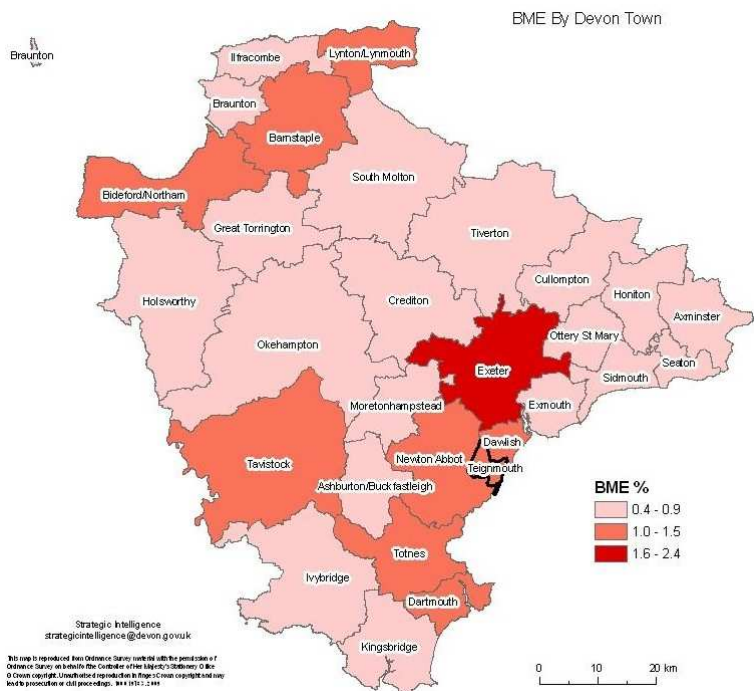

The following chart compares index of multiple deprivation scores for the urban area of Teignmouth with the surrounding rural hinterland, along with average urban and rural Index of Multiple Deprivation scores for Devon and England as a whole.

This reveals that in general the urban centre of Teignmouth is much more deprived than the surrounding rural area. The pattern of urban and rural deprivation in Teignmouth is similar to the profile for England as a whole.

POPULATION

The population of Teignmouth is predicted to increase by 2,342 people between 2006 and 2021 – a rise of 12.2%. The total number in the younger age groups (from 0 to 19) is predicted to decrease by 144 to 3,766 – a fall of 3.7%. The 20 to 44 year age band is predicted to see an increase of 32 to 4,588 or 0.7%. The 45 to 64 age group should also see an increase, in this case of 739 people (13.4%) to 6,266. The older age groups (65 years and older) are due to see an increase in number of 1,715. This equates to a 32.6% increase over the 15 years that these projections cover and will take the population in this group up to 6,979. The largest change is predicted to be in the 70 to 74 age group with an increase of 45.5%.

The proportion of Teignmouth's population from BME communities based on the 2001 census is in line with the overall Devon BME of 1.1%.

BIRTHS

The birth rate in the Teignmouth area is in line with the Devon average, with around 150 births per year. Birth rates are higher in the rural hinterland.

Area	Average births per year	Birth Rate
Teignmouth Centre	119	48.27
Teignmouth Hinterland	28	58.75
Teignmouth Town Area	147	49.98
Teignbridge District	1,139	51.89
Southern Locality	2,272	50.52
Devon	6,721	50.02
Devon Urban	4,797	50.35
Devon Rural	1,925	49.24

LIFE EXPECTANCY

Life expectancy in the Teignmouth area is above the average life expectancy in Devon. Longer average life expectancy is seen in the rural area.

Area	Female	Male	Total
Teignmouth Centre	82.7	79.0	81.0
Teignmouth Hinterland	84.2	81.2	82.8
Teignmouth Town Area	83.2	79.5	81.5
Teignbridge District	83.0	79.6	81.4
Southern Locality	83.2	79.3	81.4
Devon	83.0	78.9	81.0
Devon Urban	82.5	78.4	80.5
Devon Rural	84.0	80.0	82.0

CHILDREN AND YOUNG PEOPLE

Teignmouth Town Area has slightly above average numbers of those with Special Educational Needs; below average GCSE performance; a higher than average youth crime rate (including a higher persistent offender rate); and an above average proportion of children and young people from black and ethnic minority groups.

SPECIAL EDUCATIONAL NEEDS (2007/08)

This graph represents the percentage of young people with SEN attending a DCC school in 07/08 by their town of residence. The national average for the proportion of pupils identified with SEN (i.e. Statemented, School Action Plus and School Action combined) is approximately 20%. We want children and young people to access services and provision within their Local Learning Communities wherever possible. Some children with complex needs will require access to specialist support in additionally resourced provision or special schools. Where there are significant variations it reflects the level of support needed within the community.

Data Source: DCSF School Census (Oct 07, Jan 08 and May 08)

YOUTH OFFENDING (2008)

Devon's First Time Entrants (FTEs) figure has been below the regional and national average since 2004/5, and continues to fall - current projections for the financial year 2009/10 are that the FTE rate will drop by over a third, compared to the baseline year of 2007/8. Within Devon, such small numbers of FTEs can cause significant statistical variations from one year to the next, particularly in the smaller towns and communities. In general, around two thirds of FTEs do not re-offend, but the pattern of those who re-offend more persistently (Persistent Youth Offenders - PYOs) is even more liable to fluctuation outside of the four largest communities (Barnstaple, Exeter, Exmouth and Newton Abbot). Preventative work by the Youth Offending Service and Children's Trust is increasingly focused, therefore, on the towns

where there is a longer term pattern of FTEs and PYOs above the Devon average. Data Source: Devon Youth Offending Team 2009

GCSE PERFORMANCE (2008)

The graph illustrates GCSE performance in 2008 for pupils in Devon Maintained Schools by Town of residence.

Devon pupils' achievement at GCSE level is slightly above the National average (49.5%) but there still too many pupils not gaining 5 or more GCSEs including Maths and English.

The Local Authority has established a 'Narrowing the Gap' Programme to improve the attainment of the lowest 20% of achievers, and a 'Raising the Bar' programme to stretch the most able.

Data Source: Devon Learning and Development Partnership

ETHNICITY AND FIRST LANGUAGE (2007/08)

This graph represents the percentage of young people with a first language other than English who were attending a DCC school in 07/08 by their town of residence.

In this time period there were 4,440 pupils from a minority ethnic background in Devon schools (4.65% of the total school population) and of these 1,731 have English as an additional language.

There are over 60 different languages spoken by children and young people in Devon schools the largest minority language groups being Polish (252) and German (88).

There are few schools without minority ethnic pupils and an increase in those schools with over 6% Black Minority and Ethnic pupils on roll. Currently, the largest ethnic group are Polish families located

across the county.

Data Source: DCSF School Census (Oct 07, Jan 08 and May 08)

ADULT AND COMMUNITY SERVICES

Older People 65+

The table illustrates that service activity for older people aged 65+ in Teignmouth is over represented when compared with the Devon average for the proportion of people based in Care Homes. The proportion receiving Community Based Care and Housing Related Support is comparable with the overall Devon average. The rate of referrals for older people aged 65+ into Adult and Community Services in Teignmouth is 196.5 (per 1000 65+ population). This is the 2nd highest referral rate for this age group across Devon (out of 29 Devon towns). The proportion of referrals for older people aged 65+ in Teignmouth dealt with at point of contact and those sent on for further assessment is in line with the overall Devon average of 14% and 86% respectively. 26% of referrals for the 65+ age group in Teignmouth are from Primary Health / Community Health.

The rate of older people aged 65+ in Teignmouth receiving assessments is 77.4 (per 1000 65+ population) and 93.9 for reviews, this is the highest rate for this age group receiving assessments across Devon. 7% of adult clients in Teignbridge who were assessed on Falls risk groups based on new enquiries received for the Home Improvement Agency were identified as in the High risk group, compared to 15% for the Devon average.

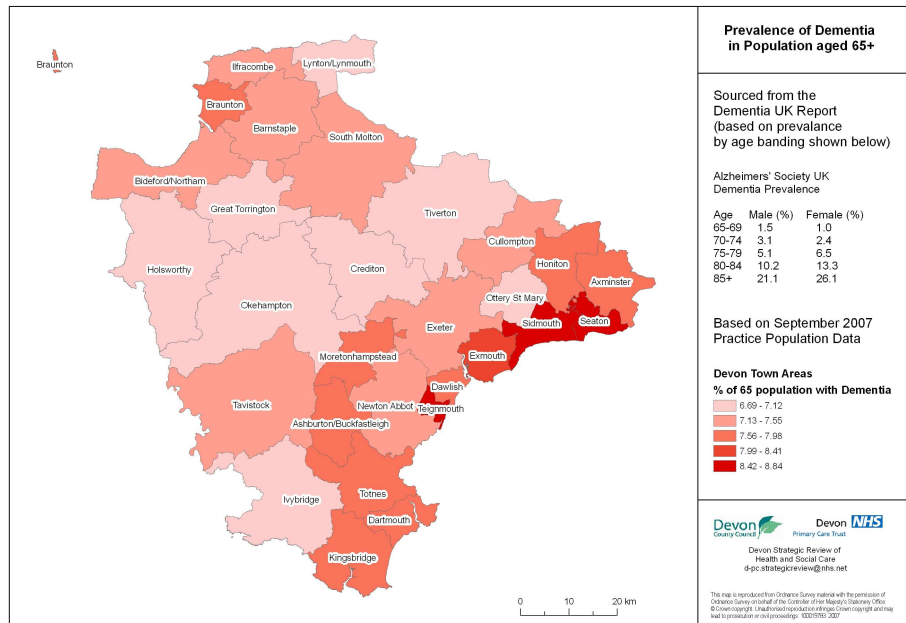

Mental Health and Learning Disabilities

Applying the nationally accepted prevalence rates for Dementia to the population in Teignmouth shows that there are an estimated 438 people in the area with Dementia. This gives an overall prevalence rate in the 65 and over population of 8.66%.

The table below presents people in Teignbridge aged 18-64 predicted to have a mental health problem, projected to 2025

	2008	2025	% Change
Depression	1,898	2,049	8%
Neurotic disorder	12,267	13,224	8%
Personality disorder	3,254	3,528	8%
Psychotic disorder	408	441	8%

Data Source: PANSI

In Teignbridge the proportion of people with learning disabilities aged 18-64 receiving Community Based Care is comparable to the overall Devon average (although in the table appears to be considerably below due to the scale used). The proportion placed in Care Homes is over represented when compared to the overall Devon average.

Physical Disabilities 18-64

This table demonstrates that Teignmouth is in line with the overall Devon average for the number of people with physical disabilities aged 18-64 receiving Community Based Care and the number based in a Care Home. There is an over representation in the rate of referrals in Teignmouth for people aged 18-64 into Adult and Community Services at 11.4 (per 1000 18-64 population). This is the 2nd highest referral rate for this age group across Devon (out of 29 Devon towns). The rate of people with physical disabilities aged 18-64 in Teignmouth receiving assessments is 3.8 (per 1000 18-64 population) and 2.1 for reviews, these rates are both comparable to the Devon average. The rate of Safeguarding alerts in Teignbridge is 1.9 (per 1000 18+ population) which is in line with Devon average of 1.6.

Carers

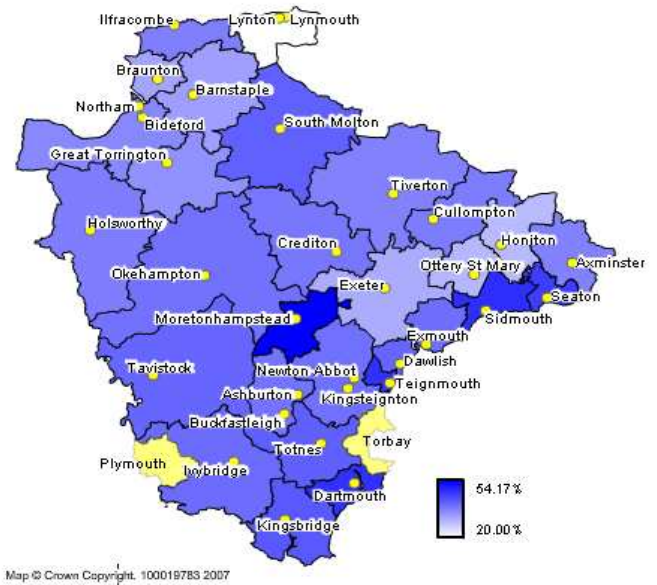

The rate of Carers assessments and reviews in Teignmouth is over represented at 11.3 (per 1000 18+ population) compared with the Devon average. The table opposite illustrates that the rate of carers receiving Information and advice provided by Carers Link services in Teignmouth is slightly above but still comparable with the Devon average. A large proportion of this is carers of people with physical disabilities and mental health problems.

Respect and consideration

Older people are able to get the support needed to continue to live at home

User Experience / Feedback

Results of the 2008 Place Survey reveal that 47.3% of Teignmouth residents who responded to the survey felt that older people are able to get the support needed to continue to live at home compared to the Devon average of 36%. The 2009 ACS User Survey results for Direct Payments recipients indicate that respondents in Teignbridge feel less safe than in Devon overall. However, low response rates in some districts can skew survey results.

HOSPITAL ACTIVITY

The rate of outpatient attendances in the Teignmouth town area is one of the highest in Devon, although the rate of elective admissions to hospital is below the Devon average. The rate of Accident and Emergency attendances is above the Devon average, whilst the rate of non-elective admissions to hospital, which cover emergencies, maternities and transfers, is below the Devon average. Higher admission and attendance rates are seen in the urban centre.

Hospital Activity, Direct Age Standardised Rates by Activity Type, 2008/9

Area	A&E Attends	Outpatient Attends	Elective Admissions	Non-Elective Admissions
Teignmouth Centre	395.0	1095.8	114.6	101.0
Teignmouth Hinterland	335.2	1059.1	90.6	69.2
Teignmouth Town Area	383.5	1086.0	109.2	94.7
Teignbridge District	335.3	1054.8	123.8	96.0
Southern Locality	261.3	975.2	110.1	93.3
Devon	300.3	951.4	126.9	104.8

PUBLIC HEALTH – ALCOHOL-RELATED ADMISSIONS

Alcohol-Related admissions include those where acute, chronic and mental conditions are known to relate either fully or partially to alcohol use. Further details on how these figures are derived can be found in the glossary. The Teignmouth area has a significantly higher rate of alcohol-related admissions than the Devon average. The admission rate is particularly high in the urban centre of Teignmouth.

Area	Admissions per year	DASR* per 100k
Teignmouth Centre	322	1549.0
Teignmouth Hinterland	92	983.0
Teignmouth Town Area	413	1438.6
Teignbridge District	2,242	1232.5
Southern Locality	4,348	1133.8
Devon	12,742	1215.3
Devon Urban	8,877	1319.4
Devon Rural	3,863	1012.1

* Direct age standardised rate, see glossary

PUBLIC HEALTH TEEN CONCEPTIONS

Levels of conceptions amongst females aged below 18 were lower than the Devon average in most areas of Teignmouth, although they were above average in the Teignmouth West ward.

PUBLIC HEALTH DEATH RATES 2003-7

The table below presents mortality or death rates for the Teignmouth town area compared with Devon. This highlights that whilst death rates in Teignmouth are typically below the Devon average, the difference is not statistically significant.

Teenage Conception Rates, 2004-6

Relationship to Devon Average

- Lower (2)
- Significantly Higher (1)
- Suppressed (2)
