

PUBLIC HEALTH DEVON OUTCOMES REPORT

10TH DECEMBER 2013

DEVON COUNTY COUNCIL

SUMMARY VERSION

The public health outcomes framework sets the context and 'strategic direction' for the new public health system with the vision of 'improving and protecting the nation's health while improving the health of the poorest fastest'. There are two overarching indicators concerning healthy life expectancy and life expectancy, and four domains with 66 further indicators, and around 130 sub-indicators. The domains are improving the wider determinants of health, health improvement, health protection, and healthcare public health. A prioritisation exercise was completed in September 2013 which looked at performance, human impact, and financial costs for these indicators and the prioritisation grid which lists out all indicators is available at

www.devonhealthandwellbeing.org.uk/jsna/performance/phof

Three types of indicators were identified from this exercise:

Core Indicators – these are indicators which have a large impact in terms of numbers affected and impact, or which are high spend areas for Public Health Devon. These indicators are covered by this report.

Improvement Indicators – these are indicators for areas where performance is poorer than expected or deteriorating and improvements to outcomes are required. These indicators are covered by this report.

Monitoring Indicators – these cover areas where local outcomes are positive and the scale, human impact and cost are not high. These indicators can be monitored through the Public Health Outcomes Tool: www.phoutcomes.info and other sources.

There are six main analyses in each individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon's position relative to the national family of peer authorities

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

Trend and Future Trajectory – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Any queries on this report should be directed to the Devon Public Health Intelligence Team at publichealthintelligence@devon.gov.uk

Public Health Devon Outcomes Report: Indicator List and Summary

Domain	RAG	Indicator	Type	Trend	Dev/SW/Eng
Overarching Indicators	G	0.01 Healthy Life Expectancy Male	Core	-
