

Health and Wellbeing Outcomes Report

Report of the Chief Executive

Recommendation: It is recommended that the Devon Health and Wellbeing Board note the updated Health and Wellbeing Outcomes Report.

1. Context

This paper introduces the current detailed outcomes report for the Devon Health and Wellbeing Board, which monitors the priorities identified in the Joint Health and Wellbeing Strategy for Devon 2013-2016.

2. The Health and Wellbeing Outcomes Report

2.1 An 'updates only' version of the Health and Wellbeing Outcomes Report for September 2014 is included separately. The report is themed around the four Joint Health and Wellbeing Strategy 2013-16 priorities, and includes breakdowns by local authority, district, clinical commissioning group, inequalities characteristics and trends over time.

2.2 The following indicators have been updated since the last report:

- Teenage Conception Rate (2013 Q2)
- Proportion of Physically Active Adults (2013)
- Alcohol-Related Admissions (2013-14)
- Incidence of Clostridium Difficile (2013-14)
- Feel Supported to Manage Own Condition (2013-14)
- Re-ablement Services – Effectiveness (2013-14)
- Re-ablement Services – Coverage (2013-14)
- Social Connectedness (2013-14)
- Stable and Appropriate Accommodation – Learning Disability (2013-14)
- Stable and Appropriate Accommodation – Mental Health (2013-14)

2.3 The latest teenage conception rate for Devon (24.1 per 1,000) is the lowest on record. Stronger decreases in the rate nationally mean that Devon remains above the South West (22.5) and local authority comparator group (22.2) rates.

2.4 Physical activity rates in Devon (60.9%) in 2013 were above South West (57.7%), local authority comparator group (57.9%) and England (55.6%) rates.

2.5 Alcohol-related admission rates in Devon (633.8) are broadly consistent with the South West (618.7) and England (633.8) rates.

2.6 There were 302 cases of Clostridium Difficile in 2013-14 in Devon, Plymouth and Torbay. The incidence rate per 100,000 in Devon (26.4) was broadly in line with the South West (26.6), nearest neighbour (25.1) and England (25.0) rates.

2.7 In Devon during 2013-14, 68.4% of people with a long-term condition in the GP survey felt they had enough support to manage their own condition. This is significantly higher than national (63.9%), South West (66.2%) and local authority comparator group (64.3%) rates.

2.8 In 2013-14, re-ablement services were effective for 89.8% of older people who received the service in Devon, which was significantly higher than the South West (79.4%), local authority comparator group (82.6%) and England (81.9%).

2.9 In 2013-14 2.0% of older people discharged from hospital in Devon were offered re-ablement services, which was significantly lower than the South West (3.7%), local authority comparator group (3.4%) and England (3.3%) rates.

2.10 Within Devon 47.5% of social care users surveyed in 2013-14 reported being satisfied with their social situation. This was significantly above South West (44.3%), local authority comparator group (45.2%) and England (44.2%) rates.

2.11 In 2013-14 74.0% of adults with a learning disability in Devon (known to the council) were living in their own home or with their family, compared with 72.7% in the South West, 72.1% in the local authority comparator group and 74.8% nationally.

2.12 In 2013-14 54.5% of adults in contact with a secondary mental health service in Devon were in stable and suitable accommodation. This is higher than the South West (50.3%) and local authority comparator group (45.2%), but below the England rate (60.9%).

2.13 The outcomes report is available on the Devon Health and Wellbeing website www.devonhealthandwellbeing.org.uk/jsna/health-and-wellbeing-outcomes-report. This includes a full report, a two page summary report, the 'updates only' report, individual two page indicator specific reports, and this briefing paper.

RAG Ratings

Red	R	Major cause for concern in Devon, benchmarking poor / off-target
Amber	A	Possible cause for concern in Devon, benchmarking average / target at risk
Green	G	No major cause for concern in Devon, benchmarking good / on-target

Table 2: Priority Area Summaries, September 2014

Priority	Summary
1. A Focus on Children and Families	Child poverty levels fell slightly between 2010 and 2011. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen over time, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.
2. Healthy Lifestyle Choices	Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.
3. Good Health and Wellbeing in Older Age	3. Good Health and Wellbeing in Older Age - Clostridium Difficile incidence aligns with South West and national rates. Devon is below South West and national rates for the detection of dementia, although detection is improving. Devon has lower levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Re-ablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.
4. Strong and Supportive Communities	4. Strong and Supportive Communities - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is above the national average. Quality of life for carers aligned with the national average. Devon had similar levels of people with learning disabilities in stable and appropriate accommodation than the national average, but lower rates for people with mental health issues.

3. Legal Considerations

There are no specific legal considerations identified at this stage.

4. Risk Management Considerations

Not applicable.

5. Options/Alternatives

Not applicable.

6. Public Health Impact

The Devon Health and Wellbeing Outcomes Report is an important element of the work of the board, drawing together priorities from the Joint Health and Wellbeing Strategy, and evidence from the Joint Strategic Needs Assessment. This report and the related documents have a strong emphasis on public health and other relevant health, social care and wellbeing outcomes. A number of the outcomes indicators are also drawn from the Public Health Outcomes Framework. The report also includes a specific focus on health inequalities.
