

PUBLIC HEALTH DEVON OUTCOMES REPORT

9TH DECEMBER 2014

DEVON COUNTY COUNCIL

UPDATES ONLY VERSION

The public health outcomes framework sets the context and 'strategic direction' for the new public health system with the vision of 'improving and protecting the nation's health while improving the health of the poorest fastest'. There are two overarching indicators concerning healthy life expectancy and life expectancy, and four domains with 66 further indicators, and around 130 sub-indicators. The domains are improving the wider determinants of health, health improvement, health protection, and healthcare public health. A prioritisation exercise was completed in September 2013 which looked at performance, human impact, and financial costs for these indicators and the prioritisation grid which lists out all indicators is available at www.devonhealthandwellbeing.org.uk/jsna/performance/phof

Three types of indicators were identified from this exercise:

Core Indicators – these are indicators which have a large impact in terms of numbers affected and impact, or which are high spend areas for Public Health Devon. These indicators are covered by this report.

Improvement Indicators – these are indicators for areas where performance is poorer than expected or deteriorating and improvements to outcomes are required. These indicators are covered by this report.

Monitoring Indicators – these cover areas where local outcomes are positive and the scale, human impact and cost are not high. These indicators can be monitored through the Public Health Outcomes Tool: www.phoutcomes.info and other sources.

There are six main analyses in each individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon's position relative to the national family of peer authorities

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

Trend and Future Trajectory – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Any queries on this report should be directed to the Devon Public Health Intelligence Team at publichealthintelligence@devon.gov.uk

Green	G	No major cause for concern in Devon, benchmarking good / on-target

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 1. Improving the Wider Determinants of Health

Indicator 1.01 Children in Poverty

Period: 2012

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

15,615 children (12.7%) in Devon live in households dependent on benefits or tax credits, compared with 15.1% in the South West and 19.2% nationally. Child poverty rates in Devon fell between 1999 and 2008 and have dropped further from the South West average over time. Rates increased in 2009 and 2010 before falling slightly in 2011 and 2012. Rates at a district level range from 10.3% in East Devon to 16.0% in Torridge. Rates in the most deprived areas are five times those in the least.

Equalities

Considerable variation exists across Devon communities. Rates of child poverty are higher in younger families due to higher benefit claimant rates and lower incomes in persons in their 20s and 30s. Single parent households, particularly where headed by a female, are also more likely to experience economic poverty, as are children of disabled parents. There are no significant variations by ethnic group in Devon.

PUBLIC HEALTH DEVON OUTCOMES REPORT

INDICATOR SPECIFICATION

Domain 1. Improving the Wider Determinants of Health

Indicator 1.01 Children in Poverty

Period: 2012

Description	Percentage of children (aged 0 to 15) living in households dependent on benefits or tax credits.
Source	HM Revenue and Customs (Personal Tax Credits: Related Statistics - Child Poverty Statistics)
Update Frequency	Annually, around 20 months in arrears (2013 due Autumn 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.01
Detailed Specification	Children living in families in receipt of Child Tax Credit (CTC) whose reported income is less than 60 per cent of the median income or are in receipt of income support (IS) or Income-Based Jobseeker's Allowance (JSA), as a proportion of the total number of children in the area.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level www.devonhealthandwellbeing.org.uk/library/maps . Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time. Trajectory is a 'no change' projection from the 2009 baseline.
Chart Notes Inequalities	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.03 Smoking at Time of Delivery

Period: 2013-14

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

In the year 2013-14, 847 mothers were smoking at time of delivery in Devon. This represents 12.2% of all mothers in Devon, compared with 13.0% in the South West, and 12.0% in England. Nationally data are no longer reported on a local authority basis but on a CCG basis. The higher Devon rate in 2013-14 is influenced by higher rates in Torbay and Plymouth. Within Devon the lowest rates were in East Devon (6.3%), and the highest in Torridge (13.2%). Rates have fallen over recent years.

Equalities

Whilst overall rates in Devon are the lowest in the South West, there is a strong inequalities gradient. Rates in the most deprived areas (25.7%) are almost five times higher than those in the least deprived areas (5.4%). Smoking at time of delivery varies by age with younger mothers in their teens and twenties much more likely to smoke than mothers in their thirties and forties.

PUBLIC HEALTH DEVON OUTCOMES REPORT

INDICATOR SPECIFICATION

Domain 2. Health Improvement
Indicator 2.03 Smoking at Time of Delivery
Period: 2013-14

Description	Number of women who currently smoke at time of delivery per 100 maternities.
Source	The Health and Social Care Information Centre, Lifestyle Statistics
Update Frequency	Annually - typically three months in arrears (2014-15 data is due July 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.03
Detailed Specification	Number of women known to smoke at time of delivery. Numerator counts for areas are based on all women resident within the PCT's boundary known to smoke. Denominator counts for areas are based on all women resident within the PCT's boundary who gave birth in the period. Data collected from Health and Social Care Information Centre's return on Smoking Status At Time of Delivery. This information has been collected using the Health and Social Care Information Centre's (HSCIC's) Omnibus system, a web based system set up to collect performance and other central returns directly from the NHS.
Chart Notes South West	Compares Primary Care Trust areas in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level www.devonhealthandwellbeing.org.uk/library/maps . Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.04 Teenage Conception Rate

Period: 2013 Q3 (rolling year) ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

There were 292 conceptions in Devon between October 2012 and September 2013 for females aged under 18, with around half leading to a birth. The latest annual conception rate is 23.3 per 1,000 females compared with 21.5 for the South West, 21.2 for the local authority comparator group and 24.8 for England. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the difference is not statistically significant. Stronger decreases in the national rate mean the gap has narrowed.

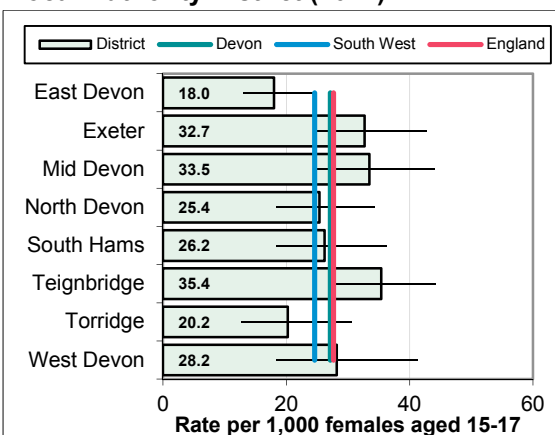

Equalities

There is a very clear link between area deprivation and teenage conception, with rates in the most deprived areas around four times higher than the least deprived areas both locally and nationally. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 60 to 70 per annum), and less than 10 births per annum to under 16s.

INDICATOR SPECIFICATION

Domain 2. Health Improvement
Indicator 2.04 Teenage Conception Rate
Period: 2013 Q3 (rolling year)

Description	Conceptions in women aged under 18 per 1,000 females aged 15-17.
Source	Office for National Statistics
Update Frequency	Quarterly - 15 months in arrears (Q4 2013 due March 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.04
Detailed Specification	Number of pregnancies that occur to women aged under 18, that result in either one or more live or still births or a legal abortion under the Abortion Act 1967. Population aged 15 to 17 derived from Office for National Statistics Mid Year Population Estimates. Conceptions are divided by population and then multiplied by 1,000.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates are not currently available at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time. Trajectory is based on 0.5 fall in rate per annum from 2009 baseline.
Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average over time.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.06 Excess Weight in Four / Five Year Olds

Period: 2013-14 (School Year) ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 23.4% of pupils in Devon were recorded in the excess weight category, compared to 23.5% for the South West (22.9%), 22.3% for the local authority comparator group, and 22.5% for England. Within Devon, Exeter (27.0%), and Torridge (25.6%) were significantly above the national rate. Rates decreased on 2013-14 levels.

Equalities

Local results by deprivation and other criteria have not yet been released. National results for 2012-13 reveal 18.2% of pupils in the excess weight category in the least deprived decile compared with 25.9% in the most deprived decile. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

Indicator 2.06 Excess Weight in 10 / 11 Year Olds

Period: 2013-14 (School Year) ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

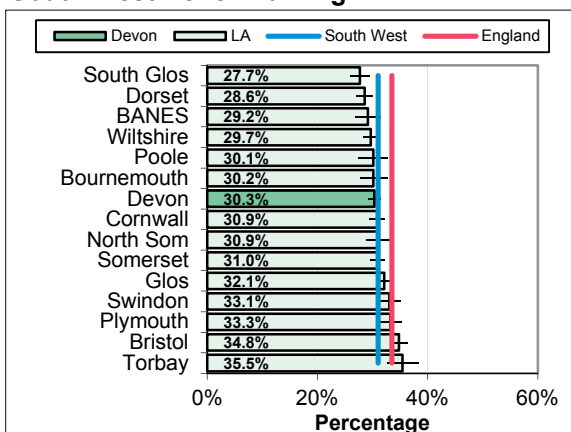

Overview

This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 30.3% of pupils in Devon were recorded in the excess weight category, which was below the South West (31.0%), local authority comparator group (30.8%), and England (33.5%) rates. The rates in the East Devon, North Devon and the South Hams were significantly below the South West and national rates. Rates have remained fairly level over recent years.

Equalities

Local results by deprivation and other criteria have not yet been released. National results for 2012-13 reveal 26.1% of pupils in the excess weight category in the least deprived decile compared with 38.1% in the most deprived decile. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.14 Adult Smoking Prevalence

Period: 2013

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

The latest figures from the Integrated Household Survey suggest that 16.4% of the adult population in Devon smoke. This is below the South West (17.3%), local authority comparator group (16.7%) and England rate (18.4%). This is also below the 2011 (19.5%) and 2012 (16.8%) although the difference is not statistically significant due to a relatively small sample size. Variations observed at a local authority district level were not statistically significant.

Equalities

Smoking rates in Devon are higher in people working in routine and manual occupations (24.6%). Levels of smoking are highest in the 16 to 29 age group, and are higher in males than females, although it should be noted that rates have been slower to fall in females. Adults smoking in the household greatly increases the likelihood of children taking up smoking at age 16.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.15 Successful Drug Treatment Comp Opiate

Period: 2013

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

9.5% of opiate users who left drug treatment successfully in Devon did not re-present to treatment within six months. This is above the South West (8.1%), local authority comparator group (8.5%) and England (7.8%) rates, but not significantly so. Rates increased on 2012 levels.

Equalities

The peak ages for drug treatment are for people in the 40s, with higher levels of males than females. People living in more deprived areas are more likely to be in drug treatment.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.22 Percentage Offered an NHS Health Check

Period: 2014-15 Q2 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

55,960 people in Devon have been offered a health check since April 2013. This represents 22.64% of the eligible population (244,934), which is below the South West (25.34%), comparator group (28.97%) and England (28.34%) rates. Within Devon rates are highest in Torridge, Teignbridge, Exeter, and West Devon. Within local CCGs, rates are highest in the South Devon and Torbay localities. The percentage offered continued to rise in Q2 narrowing the gap to other areas.

Equalities

Whilst practices covering areas with below average deprivation have the lowest offered rates, the pattern by deprivation is mixed, with high rates in practices with above average levels of deprivation highlighting that the programme is more established in Torridge, Teignbridge, Exeter and the Exmouth area and also in the least deprived practices.

Domain 2. Health Improvement

Indicator 2.22 Percentage Receiving an NHS Health Check

Period: 2014-15 Q2 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

26,884 people in Devon received a health check since April 2013. This represents 10.88% of the eligible population (244,934), which is below the South West (11.41%), comparator group (12.90%) and England (13.52%) rates. Within Devon rates are highest in Torridge and Teignbridge. Within local CCGs, rates are highest in the South Devon and Torbay localities. The percentage receiving a health check continued to rise in Q2, narrowing the gap to other areas.

Equalities

The pattern by deprivation is mixed at present, with high rates in areas with above average levels of deprivation highlighting that the programme is more established in Torridge. Rates were also higher in the least deprived practices, whereas rates in the other three practice deprivation quintiles were broadly similar.

Domain 2. Health Improvement

Indicator 2.22 NHS Health Check Uptake Rate

Period: 2014-15 Q2 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

The uptake rate for NHS health checks in Devon current stands at 48.04%, which is above the South West (45.03%), local authority comparator group (44.53%) rates, and England (47.72%) rates. Within Devon rates are highest in the South Hams and lowest in Exeter and West Devon. Within local CCGs, rates are highest in the South Devon and Torbay localities. The uptake rate has improved over recent quarters.

Equalities

The pattern by deprivation is mixed at present, with high rates in areas with below average levels of deprivation and in the most deprived areas, which is more indicative of variations between different areas of Devon.

Domain 4. Healthcare Public Health

Indicator 4.03 Mortality Rate from preventable causes

Period: 2011-2013

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

The mortality rate from causes considered preventable in Devon is 156.6 per 100,000, which is significantly below the South West (165.2), local authority comparator group (163.2) and England (183.9) rates. Within Devon rates were highest in Exeter (180.5) and lowest in Mid Devon (136.2). The rate has fallen over time from 204.5 in 2001-03 to 156.6 in 2011-13.

Equalities

Mortality rates from preventable causes tend to be higher in males than females. Preventable mortality rates are higher in more deprived areas across all age groups.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 4. Healthcare Public Health

Indicator 4.04 Under 75 Mortality Rate - Circulatory Diseases

Period: 2011-2013

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013, there were 500 circulatory deaths in under 75s, with an direct age standardised rate of 63.8 per 100,000 for 2011-13. The Devon rate in 2011-13 was below the South West (67.1), local authority comparator group (66.7) and England (78.2) rates. Within the county, rates are highest in Exeter and Torridge. Mortality rates fell from 107.7 in 2001-03. Whilst rates have fallen more quickly in areas of above average deprivation, the gap persisted for those in the most deprived areas.

Equalities

Mortality from circulatory disease increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group, and very few deaths in persons aged under 40. In Devon mortality rates are 2.5 times higher in males than females. In terms of ethnicity, the British Heart Foundation highlight that whilst risks did not vary considerably by ethnic group for females, white males were at higher risk.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 4. Healthcare Public Health

Indicator 4.05 Under 75 Mortality Rate - All Cancers

Period: 2011-2013

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013, there were 942 deaths due to cancer in under 75s, with an direct age standardised rate of 130.9 per 100,000 for 2010-12. The Devon rate in 2011-13 was below the South West (134.3), local authority comparator group (134.3), and England (144.4) rates. Within the county, rates are highest in North Devon (147.4). Mortality rates by year have fallen from 157.2 in 2001-03. Mortality rates are higher in more deprived areas, although the health inequality gap has decreased over recent years.

Equalities

Mortality from cancer increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group. Mortality rates from cancer are around 20% higher in males than females in England. In terms of ethnicity, Cancer Research UK suggests higher mortality rates in white groups, although survival rates for breast cancer are lower in Asian and Black ethnic groups.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 4. Healthcare Public Health

Indicator 4.10 Suicide Rate

Period: 2011-2013

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

Around 65 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.4 per 100,000. This was above the South West (10.1), local authority comparator group (9.5) and England (8.8) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen due to the small numbers involved, rates in Devon have typically remained around or slightly above the national rate.

Equalities

There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable in males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.
