

# HEALTH AND WELLBEING OUTCOMES REPORT

## 11TH SEPTEMBER 2014

### DEVON HEALTH AND WELLBEING BOARD

#### UPDATES ONLY VERSION

The Joint Health and Wellbeing Strategy has four priority areas and the selected indicators in this report align to these. Further to this, there are three types of indicators reflecting how the board will address the issue in question. These three types are:

**Challenge Indicators** – these cover areas where outcomes are poor, where inequalities are widening locally, or areas which are critical to future plans to improve health and wellbeing. The board will monitor these indicators and challenge current processes and practices in lead organisations in these areas.

**Monitoring ‘Watching Brief’ Indicators** – these cover areas where local outcomes are positive or where improvements have been made. The role of the board will be to monitor these indicators and intervene should outcomes deteriorate.

**Commissioning Improvement Indicators** – these are indicators for areas where joint working is required to improve outcomes and where the board will need to play a more active role in coordinating local commissioning.

Joint Health and Wellbeing Strategy indicators are set out in the grid on the next page, grouped against the four Joint Health and Wellbeing Strategy priorities and three indicator types. The outcomes framework they align to is identified within brackets. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each individual indicator report:

**South West Benchmarking** – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

**Local Authority District** – highlighting differences within Devon between local authority districts.

**Local Authority Comparator Group** – showing Devon’s position relative to the national family of peer authorities

**Clinical Commissioning Group and Locality Comparison** – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

**Trend and Future Trajectory** – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

**Inequalities** – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

**\*UPDATED INDICATOR\***

Any queries on this report should be directed to the Devon Public Health Intelligence Team at

## RAG Ratings

<b>Red</b>	<b>R</b>	Major cause for concern in Devon, benchmarking poor / off-target
<b>Amber</b>	<b>A</b>	Possible cause for concern in Devon, benchmarking average / target at risk
<b>Green</b>	<b>G</b>	No major cause for concern in Devon, benchmarking good / on-target

## Priority Area Summaries

**1. A Focus on Children and Families** - Child poverty levels fell slightly between 2010 and 2011. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen over time, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.

**2. Healthy Lifestyle Choices** - Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.

**3. Good Health and Wellbeing in Older Age** - Clostridium Difficile incidence aligns with South West and national rates. Devon is below South West and national rates for the detection of dementia, although detection is improving. Devon has lower levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Reablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.

**4. Strong and Supportive Communities** - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is above the national average. Quality of life for carers aligned with the national average. Devon had similar levels of people with learning disabilities in stable and appropriate accommodation than the national average, but lower rates for people with mental health issues.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Teenage Conception Rate

Period: 2013 Q2 (rolling year) **\*UPDATED INDICATOR\***

RAG Rating	
	Green
A	Amber
	Red

**Overview**  
 There were 303 conceptions in Devon between July 2012 and June 2013 for females aged under 18, with around half leading to a birth. The latest annual conception rate is 24.1 per 1,000 females compared with 22.5 for the South West, 22.2 for the local authority comparator group and 25.7 for England. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the difference is not statistically significant. Stronger decreases in the national rate mean the gap has narrowed.

**Equalities**  
 There is a very clear link between area deprivation and teenage conception, with rates in the most deprived areas around four times higher than the least deprived areas both locally and nationally. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 60 to 70 per annum), and less than 10 births per annum to under 16s.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

### Priority 1: A Focus on Children and Families

**Indicator:** Teenage Conception Rate

**Period:** 2013 Q2 (rolling year)

<b>Description</b>	Conceptions in women aged under 18 per 1,000 females aged 15-17.
<b>Source</b>	Office for National Statistics
<b>Update Frequency</b>	Quarterly - 15 months in arrears (Q3 2013 due December 2014)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.04
<b>Detailed Specification</b>	Number of pregnancies that occur to women aged under 18, that result in either one or more live or still births or a legal abortion under the Abortion Act 1967. Population aged 15 to 17 derived from Office for National Statistics Mid Year Population Estimates. Conceptions are divided by population and then multiplied by 1,000.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time. Trajectory is based on 0.5 fall in rate per annum from 2009 baseline.
<b>Chart Notes Inequalities</b>	Compares rates in the wards with the highest teenage conception areas with the Devon average over time.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Proportion of Physically Active Adults

Period: 2013

**\*UPDATED INDICATOR\***

RAG Rating	
G	Green
	Amber
	Red

**Overview**  
60.9% of adults in Devon were physically active for at least 150 minutes per week in 2013. This is significantly above the South West (57.7%), comparator group (57.9%) and national (55.6%) rates. Rates in Devon were the highest in the local authority comparator group. Rates were significantly higher in West Devon (68.3%), although the differences between the districts themselves were not statistically significant. Levels of physical activity increased from 59.5% in 2012 to 60.9% in 2013.

**Equalities**  
Local breakdowns by deprivation or equality characteristics are not available. National results from the Active People survey highlight that physical activity rates are higher in less deprived areas and professional groups. Participation is also higher in males and younger age groups. There are no significant differences by ethnicity. Activity rates are significantly lower in people with limiting long-term health problems.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

### Priority 2: Healthy Lifestyle Choices

**Indicator:** Proportion of Physically Active Adults

**Period:** 2013

<b>Description</b>	Percentage of adults achieving at least 150 minutes of physical activity per week in accordance with UK CMO recommended guidelines on physical activity.
<b>Source</b>	Sport England's Active People Survey (APS) <a href="http://www.sportengland.org/research.aspx">http://www.sportengland.org/research.aspx</a>
<b>Update Frequency</b>	Annually, around eight months in arrears (2014 update expected August 2015)
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.13 will relate to physical activity / inactivity - indicator still in development and likely to deviate from this measure.
<b>Detailed Specification</b>	The number of respondents aged 16 and over, with valid responses to questions on physical activity, doing at least 150 "equivalent" minutes of at least moderate intensity physical activity per week in bouts of 10 minutes or more in the previous 28 days expressed as a percentage of the total number of respondents aged 16.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates cannot currently be calculated at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## Priority 2: Healthy Lifestyle Choices

### Indicator: Alcohol-Related Admissions (narrow definition)

Period: 2013-14

**\*UPDATED INDICATOR\***

#### RAG Rating

	Green
A	Amber
	Red

**Overview**  
Using the new narrow definition as used in the Public Health Outcomes Framework, there were around 4,957 alcohol-related admissions to hospital for Devon residents in 2013-14. The Direct Age Standardised Rate of Admissions (633.8 per 100,000) is broadly in line with the South West and national rates but significantly above the local authority comparator group rate. Rates within Devon are highest in Exeter and Northern Devon. Admission rates are significantly higher in more deprived areas.

**Equalities**  
Alcohol-Related Admission rates vary by age, with the highest rates in older age groups, reflecting the long-term effects of alcohol-use through life. Acute admissions (accidents and poisonings) are most common in young adults, mental health admissions in persons in their 40s and 50s, and admissions for chronic conditions in older age groups. Admission rates are higher for males than females.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

### Priority 2: Healthy Lifestyle Choices

**Indicator:** Alcohol-Related Admissions (narrow definition)

**Period:** 2013-14

<b>Description</b>	Direct age-standardised rate of hospital admissions involving an alcohol-related primary diagnosis or an alcohol-related external cause per 100,000 population.
<b>Source</b>	North West Public Health Observatory (nationally published data) and Devon Public Health Intelligence Team (local breakdowns)
<b>Update Frequency</b>	Quarterly - typically six months in arrears, Annually - typically nine months in arrears. Local data feeds typically two months in arrears.
<b>Outcomes Framework</b>	Public Health Outcomes Framework Indicator 2.18
<b>Detailed Specification</b>	Admissions to hospital involving an alcohol-related primary diagnosis or an alcohol-related external cause. Admissions of children under 16 were only included if they had an alcohol-specific diagnosis i.e. where the attributable fraction = 1, meaning that the admission is treated as being wholly attributable to alcohol. For other conditions, estimates of the alcohol-attributable fraction were not available for children. A detailed definition of the numerator data used for this indicator can be found at: <a href="http://www.lape.org.uk/downloads/Lape_guidance_and_methods.pdf">www.lape.org.uk/downloads/Lape_guidance_and_methods.pdf</a>
<b>Chart Notes South West</b>	Compares Primary Care Trusts in the South West Region. Will be changed to upper tier / unitary local authority analysis in 2013-14. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates cannot currently be calculated at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within England based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

**Priority 3: Good Health and Wellbeing in Older Age**

**Indicator: Incidence of Clostridium Difficile**

**Period: 2013-14**

**\*UPDATED INDICATOR\***

RAG Rating	
	Green
A	Amber
	Red

**Overview**  
 There were 302 cases of Clostridium Difficile in 2013-14 in Devon, Plymouth and Torbay. The incidence rate per 100,000 in Devon (26.4) was broadly in line with the South West (26.6), nearest neighbour (25.1) and England (25.0) rates. Infection rates have reduced over time, and a particularly notable fall was seen between 2011-12 and 2012-13 following the introduction of consistent national guidance for reporting.

**Equalities**  
 Incidence of Clostridium Difficile increases significantly with age, with a rate in 2012-13 of 9.7 per 100,000 in those aged 40 to 59 compared to 282.0 per 100,000 for those aged 80 and over. This is a consequence of higher hospital admissions in these age groups, a greater likelihood of living in a communal establishment (care homes) and poorer general health. Rates are also higher in females and in more

<b>Chart Notes CCG/Localities</b>	No longer available for Clinical Commissioning Group localities or sub-localities.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	No longer available.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Feel Supported to Manage Own Condition

Period: 2013-14

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

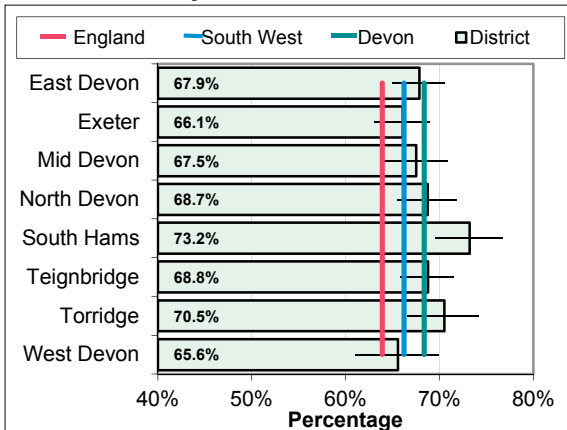

**Overview**  
In Devon during 2013-14, 68.4% of people with a long-term condition in the GP survey, felt they had enough support to manage their own condition. This is significantly higher than national (63.9%), South West (66.2%) and local authority comparator group (64.3%) rates. Rates in NEW Devon CCG (67.5%) and South Devon and Torbay CCG (68.4%) were broadly similar, and highest in the Moor-to-Sea locality (73.9%). Rates have also increased on 2012-13 levels.

**Equalities**  
There was no clear relationship between feeling supported to manage their own condition and deprivation. National results reveal the older age groups (85 and over, 69.2%) feel better supported than younger age groups (18 to 24, 58.2%), males (65.3%) feel better supported than females (62.0%), and minority ethnic groups feel less well supported.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Priority 3:** Good Health and Wellbeing in Older Age

**Indicator:** Feel Supported to Manage Own Condition

**Period:** 2013-14 Q1-Q2

<b>Description</b>	Weighted percentage of people feeling supported to manage their condition.
<b>Source</b>	NHS GP Patient Survey
<b>Update Frequency</b>	Two times a year, next update due January 2015.
<b>Outcomes Framework</b>	NHS Outcomes Framework Indicator 2.1
<b>Detailed Specification</b>	Numerator: For people who answer yes to the Question 30 "Do you have a long-standing health condition", the numerator is the total number of 'Yes, definitely' or 'Yes, to some extent' answers to GPPS Question 32: In the last 6 months, have you had enough support from local services or organisations to help you manage your long-term condition(s)? Please think about all services and organisations, not just health services • Yes, definitely • Yes, to some extent • No • I have not needed such support • Don't know/can't say. Responses weighted according to the following 0-100 scale: "No" = 0 "Yes, to some extent" = 50 "Yes, definitely" = 100.
<b>Chart Notes South West</b>	Compares Former Primary Care Trusts in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on GP practice attributions. Error bar is 95% confidence interval.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Re-ablement Services (Effectiveness)

Period: 2013-14

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

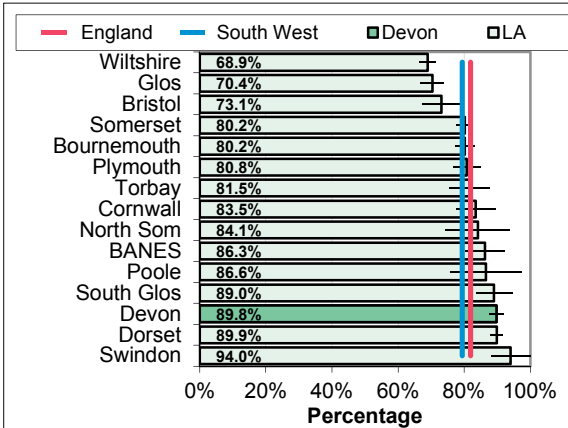

### Overview

In 2013-14, reablement services were effective for 89.8% of older people who received the service in Devon, which was significantly higher than the South West (79.4%), local authority comparator group (82.6%) and England (81.9%). The rate increased from 87.9% in 2012-13. Within Devon the highest rates were seen in Exeter (96.9%).

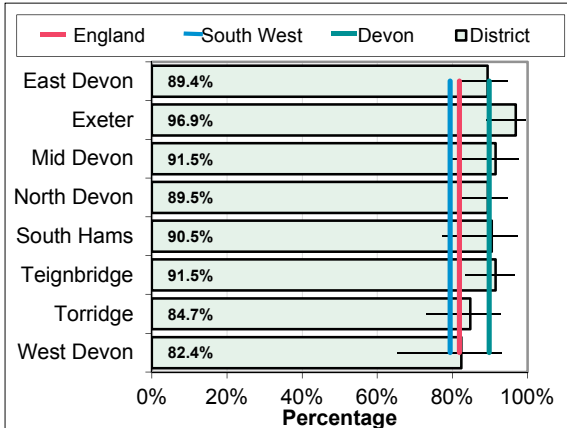

### Equalities

There is no significant link between the effectiveness of reablement services and deprivation levels in Devon.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Social Contentedness

Period: 2013-14

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

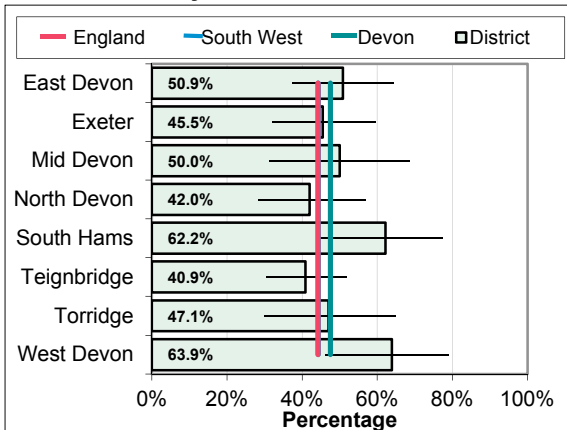

**Overview**  
47.5% of social care users surveyed in Devon in 2013-14 reported being satisfied with their social situation. This was significantly above South West (44.3%), local authority comparator group (45.2%) and England (44.2%) rates. Within Devon whilst there is some variation in responses at district level, smaller sample sizes mean the differences are not statistically significant. Rates increased significantly on 2012-13 levels.

**Equalities**  
Female social care users in Devon reported being more satisfied with their social situation than male social care users. Social care users with Learning Disabilities reported being the most satisfied with their level of social contact compared with other client groups.

**Overview**  
The nature of accommodation for people with learning disabilities has a strong impact on their safety and overall quality of life and the risk of social exclusion. In 2013-14 74.0% of adults with a learning disability in Devon (known to the council) were living in their own home or with their family, compared with 72.7% in the South West, 72.1% in the local authority comparator group and 74.8% nationally. Rates increased on 2012-13 levels (69.1%).

**Equalities**  
A higher proportion of younger adults (18-30) with a learning disability are in stable and suitable accommodation in Devon, compared to 31-64 year olds.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

## INDICATOR SPECIFICATION

**Priority 4:** Strong and Supportive Communities

**Indicator:** Stable/Appropriate Accommodation (Learning Dis.)

**Period:** 2013-14

<b>Description</b>	Proportion of adults with a learning disability who live in their own home or with their family.
<b>Source</b>	Adult Social Care Combined Activity Return. National Adult Social Care Intelligence Service (SW Benchmarking, Trend and Comparator Group) DCC Management Information Team (District, Inequalities and CCG / Locality Comparison)
<b>Update Frequency</b>	Annually, around four months in arrears.
<b>Outcomes Framework</b>	Adult Social Care Outcomes Framework Indicator 1G, Public Health Outcomes Framework Indicator 1.6
<b>Detailed Specification</b>	The proportion of all adults with a learning disability who are known to the council, who are recorded as living in their own home or with their family. The definition of individuals 'known to the council' is currently restricted to those adults with a learning disability (with a primary client group of LD) who have been assessed or reviewed by the council during the year (irrespective of whether or not they receive a service) or who should have been reviewed but were not.
<b>Chart Notes South West</b>	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
<b>Chart Notes Local Authority</b>	Rates cannot currently be calculated at a local level.
<b>Chart Notes Comparator</b>	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
<b>Chart Notes CCG/Locality</b>	Rates are not currently available at a Clinical Commissioning Group and locality level.
<b>Chart Notes Trend</b>	Compares Devon rate with South West region and England over time.
<b>Chart Notes Inequalities</b>	Rates cannot currently be calculated at a local level.

# DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Stable/Appropriate Accommodation (Mental Health)

Period: 2013-14

**\*UPDATED INDICATOR\***

## RAG Rating

G	Green
	Amber
	Red

**Overview**  
Stable and appropriate accommodation is closely linked to improving safety and reducing the risk of social exclusion. In 2013-14 54.5% of adults in contact with a secondary mental health service in Devon were in stable and suitable accommodation. This is higher than the South West (50.3%) and local authority comparator group (45.2%), but below the England rate (60.9%). Rates have decreased in Devon over recent years.

**Equalities**  
Not currently available at a local level.
