

HEALTH AND WELLBEING OUTCOMES REPORT

15TH JANUARY 2015

DEVON HEALTH AND WELLBEING BOARD

UPDATES ONLY VERSION

The Joint Health and Wellbeing Strategy has four priority areas and the selected indicators in this report align to these. Further to this, there are three types of indicators reflecting how the board will address the issue in question. These three types are:

Challenge Indicators – these cover areas where outcomes are poor, where inequalities are widening locally, or areas which are critical to future plans to improve health and wellbeing. The board will monitor these indicators and challenge current processes and practices in lead organisations in these areas.

Monitoring ‘Watching Brief’ Indicators – these cover areas where local outcomes are positive or where improvements have been made. The role of the board will be to monitor these indicators and intervene should outcomes deteriorate.

Commissioning Improvement Indicators – these are indicators for areas where joint working is required to improve outcomes and where the board will need to play a more active role in coordinating local commissioning.

Joint Health and Wellbeing Strategy indicators are set out in the grid on the next page, grouped against the four Joint Health and Wellbeing Strategy priorities and three indicator types. The outcomes framework they align to is identified within brackets. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon’s position relative to the national family of peer authorities

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

Trend and Future Trajectory – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Green	G	No major cause for concern in Devon, benchmarking good / on-target

Priority Area Summaries

1. A Focus on Children and Families - Child poverty levels fell between 2011 and 2012. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen over time, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.

2. Healthy Lifestyle Choices - Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.

3. Good Health and Wellbeing in Older Age - Clostridium Difficile incidence aligns with South West and national rates. The gap between Devon and the South West and England for the detection of dementia, has narrowed. Devon has relatively low levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Reablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.

4. Strong and Supportive Communities - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon than nationally. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is above the national average. Quality of life for carers is in line with the national average. Devon had similar levels of people with learning disabilities in stable and appropriate accommodation than the national average, but lower rates for people with mental health issues.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Children in Poverty

Period: 2012

UPDATED INDICATOR

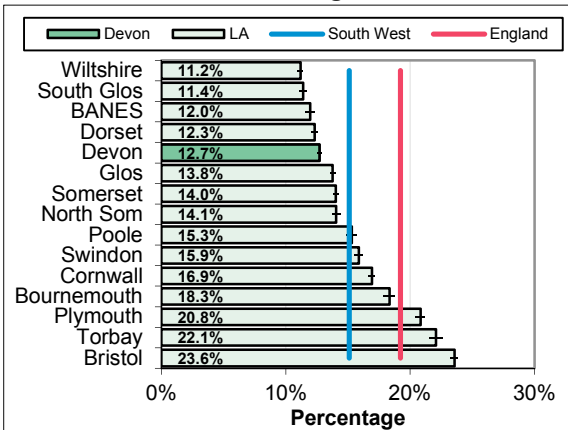

RAG Rating

	Green
A	Amber
	Red

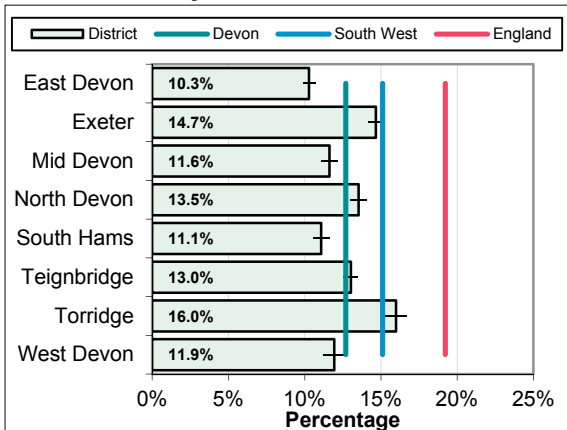

Overview
15,615 children (12.7%) in Devon live in households dependent on benefits or tax credits, compared with 15.1% in the South West and 19.2% nationally. Child poverty rates in Devon fell between 1999 and 2008 and have dropped further from the South West average over time. Rates increased in 2009 and 2010 before falling slightly in 2011 and 2012. Rates at a district level range from 10.3% in East Devon to 16.0% in Torridge. Rates in the most deprived areas are five times those in the least.

Equalities
Considerable variation exists across Devon communities. Rates of child poverty are higher in younger families due to higher benefit claimant rates and lower incomes in persons in their 20s and 30s. Single parent households, particularly where headed by a female, are also more likely to experience economic poverty, as are children of disabled parents. There are no significant variations by ethnic group in Devon.

Priority 1: A Focus on Children and Families

Indicator: Early Years Foundation Score

Period: 2013-14 (School Year) ***UPDATED INDICATOR***

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013-14 67% in Devon achieved the expected level in the Early Years Foundation Stage, which was significantly above the South West (61%), local authority comparator group (60%) and England (58%) rates. Within Devon this varied from 58.7% in Mid Devon to 70.8% in the South Hams. Rates increased from 64% in 2012-13.

Equalities

The percentage achieved is lower in the more deprived areas in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Smoking at Time of Delivery

Period: 2013-14

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview
 In the year 2013-14, 847 mothers were smoking at time of delivery in Devon. This represents 12.2% of all mothers in Devon, compared with 13.0% in the South West, and 12.0% in England. Nationally data are no longer reported on a local authority basis but on a CCG basis. The higher Devon rate in 2013-14 is influenced by higher rates in Torbay and Plymouth. Within Devon the lowest rates were in East Devon (6.3%), and the highest in Torridge (13.2%). Rates have fallen over recent years.

Equalities
 Whilst overall rates in Devon are the lowest in the South West, there is a strong inequalities gradient. Rates in the most deprived areas (25.7%) are almost five times higher than those in the least deprived areas (5.4%). Smoking at time of delivery varies by age with younger mothers in their teens and twenties much more likely to smoke than mothers in their thirties and forties.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 1: A Focus on Children and Families

Indicator: Smoking at Time of Delivery

Period: 2013-14

Description	Number of women who currently smoke at time of delivery per 100 maternities.
Source	The Health and Social Care Information Centre, Lifestyle Statistics
Update Frequency	Annually - typically three months in arrears (2014-15 data is due July 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.03
Detailed Specification	Number of women known to smoke at time of delivery. Numerator counts for areas are based on all women resident within the PCT's boundary known to smoke. Denominator counts for areas are based on all women resident within the PCT's boundary who gave birth in the period. Data collected from Health and Social Care Information Centre's return on Smoking Status At Time of Delivery. This information has been collected using the Health and Social Care Information Centre's (HSCIC's) Omnibus system, a web based system set up to collect performance and other central returns directly from the NHS.
Chart Notes South West	Compares Primary Care Trust areas in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates are not currently available at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Teenage Conception Rate

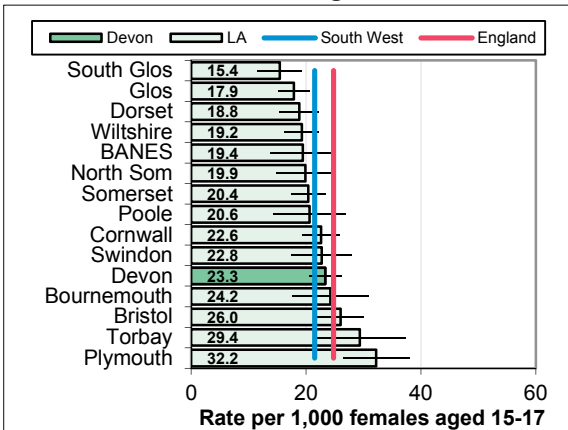

Period: 2013 Q3 (rolling year) ***UPDATED INDICATOR***

RAG Rating	
	Green
A	Amber
	Red

Overview
 There were 292 conceptions in Devon between October 2012 and September 2013 for females aged under 18, with around half leading to a birth. The latest annual conception rate is 23.3 per 1,000 females compared with 21.5 for the South West, 21.2 for the local authority comparator group and 24.8 for England. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the difference is not statistically significant. Stronger decreases in the national rate mean the gap has narrowed.

Equalities
 There is a very clear link between area deprivation and teenage conception, with rates in the most deprived areas around four times higher than the least deprived areas both locally and nationally. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 60 to 70 per annum), and less than 10 births per annum to under 16s.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Excess Weight in Four / Five Year Olds

Period: 2013-14 (School Year) ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview
This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 23.4% of pupils in Devon were recorded in the excess weight category, compared to 23.5% for the South West (22.9%), 22.3% for the local authority comparator group, and 22.5% for England. Within Devon, Exeter (27.0%), and Torridge (25.6%) were significantly above the national rate. Rates decreased on 2013-14 levels.

Equalities
Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

Priority 2: Healthy Lifestyle Choices

Indicator: Excess Weight in 10 / 11 Year Olds

Period: 2013-14 (School Year) ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview
This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 30.3% of pupils in Devon were recorded in the excess weight category, which was below the South West (31.0%), local authority comparator group (30.8%), and England (33.5%) rates. The rates in the East Devon, North Devon and the South Hams were significantly below the South West and national rates. Rates have remained fairly level over recent years.

Equalities
Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Adult Smoking Prevalence

Period: 2013

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

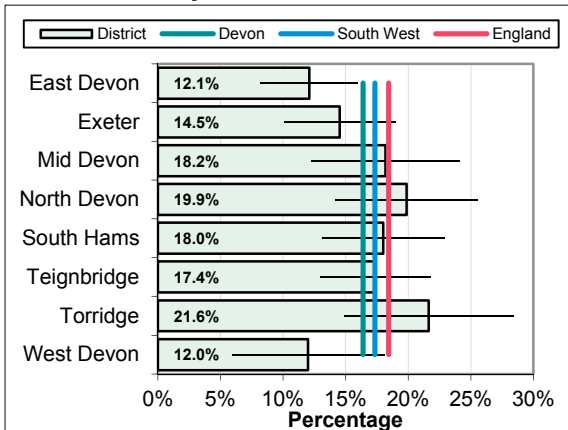

Overview
The latest figures from the Integrated Household Survey suggest that 16.4% of the adult population in Devon smoke. This is below the South West (17.3%), local authority comparator group (16.7%) and England rate (18.4%). This is also below the 2011 (19.5%) and 2012 (16.8%) although the difference is not statistically significant due to a relatively small sample size. Variations observed at a local authority district level were not statistically significant.

Equalities
Smoking rates in Devon are higher in people working in routine and manual occupations (24.6%). Levels of smoking are highest in the 16 to 29 age group, and are higher in males than females, although it should be noted that rates have been slower to fall in females. Adults smoking in the household greatly increases the likelihood of children taking up smoking at age 16.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Under 75 Mortality Rate - All Cancers

Period: 2011-13

UPDATED INDICATOR

RAG Rating	
G	Green
	Amber
	Red

Overview
 In 2013, there were 942 deaths due to cancer in under 75s, with an direct age standardised rate of 130.9 per 100,000 for 2011-13. The Devon rate in 2011-13 was below the South West (134.3), local authority comparator group (134.3), and England (144.4) rates. Within the county, rates are highest in North Devon (147.4). Mortality rates by year have fallen from 157.2 in 2001-03. Mortality rates are higher in more deprived areas, although the health inequality gap has decreased over recent years.

Equalities
 Mortality from cancer increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group. Mortality rates from cancer are around 20% higher in males than females in England. In terms of ethnicity, Cancer Reseach UK suggests higher mortality rates in white groups, although survival rates for breast cancer are lower in Asian and Black ethnic groups.

Priority 2: Healthy Lifestyle Choices

Indicator: Under 75 Mortality Rate - All Circulatory Diseases

Period: 2011-13

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview
 In 2013, there were 500 circulatory deaths in under 75s, with an direct age standardised rate of 63.8 per 100,000 for 2011-13. The Devon rate in 2011-13 was below the South West (67.1), local authority comparator group (66.7) and England (78.2) rates. Within the county, rates are highest in Exeter and Torridge. Mortality rates fell from 107.7 in 2001-03. Whilst rates have fallen more quickly in areas of above average deprivation, the gap persisted for those in the most deprived areas.

Equalities
 Mortality from circulatory disease increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group, and very few deaths in persons aged under 40. In Devon mortality rates are 2.5 times higher in males than females. In terms of ethnicity, the British Heart Foundation highlight that whilst risks did not vary considerably by ethnic group for females, white males were at higher risk.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 2: Healthy Lifestyle Choices

Indicator: Under 75 Mortality Rate - All Circulatory Diseases

Period: 2011-13

Description	Direct age-standardised rate (DASR) of mortality from all cardiovascular diseases (including heart disease and stroke) in persons less than 75 years per 100,000 population.
Source	Office for National Statistics annual death extracts (South West Benchmarking, Local Authority District, Trend and Local Authority Comparator Group). Devon Public Health Intelligence Team (Inequalities and CCG / Locality Comparison)
Update Frequency	Annually, nine months in arrears (2014 results due October 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 4.04i, NHS Outcomes Framework Indicator 1.1
Detailed Specification	Number of deaths from all cardiovascular diseases (classified by underlying cause of death recorded as ICD codes I00-I99) registered in the respective calendar years, in people aged under 75, aggregated into quinary age bands. Population for people aged under 75, aggregated into quinary age bands. Age specific rates are calculated and multiplied by the standard population for each age group and aggregated to give the age adjusted count of deaths for the area, and divided by the total standard population and multiplied by 100,000 to give the age standardised mortality rate for the area. The 2013 revision to the European Standard Population has been used for
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level www.devonhealthandwellbeing.org.uk/library/maps . Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Suicide Rate

Period: 2011-13

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview
 Around 65 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.4 per 100,000. This was above the South West (10.1), local authority comparator group (9.5) and England (8.8) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen due to the small numbers involved, rates in Devon have typically remained around or slightly above the national rate.

Equalities
 There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable in males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.
