

PUBLIC HEALTH DEVON OUTCOMES REPORT

17TH MARCH 2015

DEVON COUNTY COUNCIL

UPDATES ONLY VERSION

The public health outcomes framework sets the context and 'strategic direction' for the new public health system with the vision of 'improving and protecting the nation's health while improving the health of the poorest fastest'. There are two overarching indicators concerning healthy life expectancy and life expectancy, and four domains with 66 further indicators, and around 130 sub-indicators. The domains are improving the wider determinants of health, health improvement, health protection, and healthcare public health. A prioritisation exercise was completed in September 2013 which looked at performance, human impact, and financial costs for these indicators and the prioritisation grid which lists out all indicators is available at www.devonhealthandwellbeing.org.uk/jsna/performance/phof

Three types of indicators were identified from this exercise:

Core Indicators – these are indicators which have a large impact in terms of numbers affected and impact, or which are high spend areas for Public Health Devon. These indicators are covered by this report.

Improvement Indicators – these are indicators for areas where performance is poorer than expected or deteriorating and improvements to outcomes are required. These indicators are covered by this report.

Monitoring Indicators – these cover areas where local outcomes are positive and the scale, human impact and cost are not high. These indicators can be monitored through the Public Health Outcomes Tool: www.phoutcomes.info and other sources.

There are six main analyses in each individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon's position relative to the national family of peer authorities

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

Trend and Future Trajectory – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Any queries on this report should be directed to the Devon Public Health Intelligence Team at publichealthintelligence@devon.gov.uk

Green	G	No major cause for concern in Devon, benchmarking good / on-target

PUBLIC HEALTH DEVON OUTCOMES REPORT

Overarching Indicators

Indicator 0.02: Male Life Expectancy Gap

Period: 2011 to 2013

UPDATED INDICATOR

RAG Rating	
G	Green
	Amber
	Red

Overview
The Slope Index of Inequality compares life expectancy in the most deprived and least deprived communities within an area's population, revealing the gap in life expectancy in years. For males in Devon the gap is 5.2 years which is significantly lower than the gaps for the South West (7.5), the local authority comparator group (7.2), and England (8.4).

Equalities
As the slope index of inequality compare the most and least deprived communities within an area's population, the smaller gap seen is partly a product of less severe social inequalities compared to other areas. The gap is more notable at the extremes with a 15 year gap in life expectancy at an electoral ward level. The life expectancy gap is much larger for males than females.

PUBLIC HEALTH DEVON OUTCOMES REPORT

INDICATOR SPECIFICATION

Overarching Indicators

Indicator 0.02: Male Life Expectancy Gap

Period: 2011 to 2013

Description	Estimated gap in male life expectancy in years between the most and least deprived communities in a given area
Source	Slope Index of Inequality, Association of Public Health Observatories, London and East Midlands Public Health Observatories (now Public Health England), CCG figures derived by Devon Public Health Intelligence Team
Update Frequency	Annually, typically around 12 months in arrears
Outcomes Framework	Public Health Outcomes Framework, Overarching Indicator 0.2 (indicator altered to cover three year period)
Detailed Specification	Local authority populations divided into 10 local deciles using Index of Multiple Deprivation 2010 at a Lower Super Output Area (LSOA) level. Life expectancy calculated for each local decile using Office for National Statistics annual mortality extracts and mid-year population estimates. Regression analysis performed across 10 local deciles to produce estimated gap in life expectancy in years within area.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	No longer available at local authority district level.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Not available at CCG or locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Shows overall average life expectancy for the most deprived 10% of the population and least deprived 10% of the population and other groups over time.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Overarching Indicators

Indicator 0.02 Female Life Expectancy Gap

Period: 2011 to 2013

UPDATED INDICATOR

RAG Rating	
G	Green
	Amber
	Red

Overview
The Slope Index of Inequality compares life expectancy in the most deprived and least deprived communities within an area's population, revealing the gap in life expectancy in years. For females in Devon the gap is 3.3 years which is significantly lower than the gaps for the South West (5.0), the local authority comparator group (5.4), and England (6.2).

Equalities
As the slope index of inequality compare the most and least deprived communities within an area's population, the smaller gap seen is partly a product of less severe social inequalities compared to other areas. The gap is more notable at the extremes with a 15 year gap in life expectancy at an electoral ward level. The life expectancy gap is much larger for males than females.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.04 Teenage Conception Rate

Period: 2013

UPDATED INDICATOR

RAG Rating	
	Green
A	Amber
	Red

Overview There were 274 conceptions in Devon in 2013 for females aged under 18, with around half leading to a birth. The latest annual conception rate is 21.9 per 1,000 females compared with 21.2 for the South West, 21.1 for the local authority comparator group and 24.3 for England. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the differences are not statistically significant. Stronger decreases in the national rate mean the gap has narrowed.

Equalities There is a very clear link between area deprivation and teenage conception, with rates in the most deprived areas around four times higher than the least deprived areas both locally and nationally. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 60 to 70 per annum), and less than 10 births per annum to under 16s.

Domain 2. Health Improvement
Indicator 2.04 Teenage Conception Rate
Period: 2013

Description	Conceptions in women aged under 18 per 1,000 females aged 15-17.
Source	Office for National Statistics
Update Frequency	Quarterly - 15 months in arrears (Q4 2013 due March 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.04
Detailed Specification	Number of pregnancies that occur to women aged under 18, that result in either one or more live or still births or a legal abortion under the Abortion Act 1967. Population aged 15 to 17 derived from Office for National Statistics Mid Year Population Estimates. Conceptions are divided by population and then multiplied by 1,000.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates are not currently available at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time. Trajectory is based on 0.5 fall in rate per annum from 2009 baseline.
Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average over time.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.08 Emotional Wellbeing of Looked After Children

Period: 2013-14

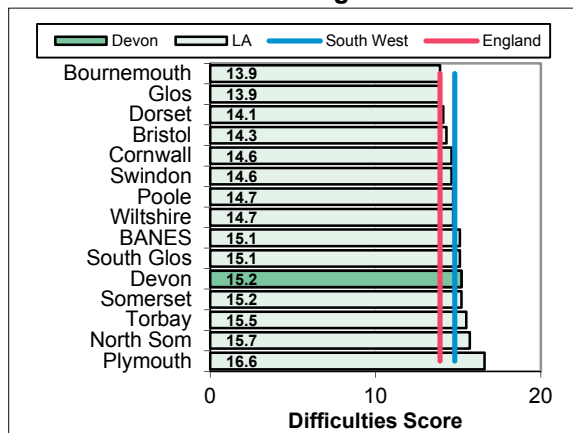

UPDATED INDICATOR

RAG Rating	
	Green
A	Amber
	Red

Overview
The difficulties score is collected through a strengths and difficulties questionnaire, with higher scores (on a scale of 0 to 40) highlighting greater difficulties. The average difficulty score in Devon was 15.2 compared which is higher than the South West (14.8), local authority comparator group (14.3) and England (13.8) averages. The average score has decreased since 2011-12 level and the gap to the regional and national average scores has lowered.

Equalities
Detailed local breakdowns by equalities characteristics are not currently available. Nationally the difficulties score tends to increase with age with teenagers having higher difficulties scores. The older age profile of children in care in Devon may well influence the higher average scores observed.

Indicator 2.08 Emotional Wellbeing of Looked After Children

Period: 2013-14

Description	Average of total difficulties score for all looked after children aged between four and 16 (inclusive) at the date of their latest assessment, who have been in care for at least 12 months on 31 March.
Source	Department for Education (Strengths and Difficulties Questionnaire - SDQ)
Update Frequency	Annual
Outcomes Framework	Public Health Outcomes Framework Indicator 2.08
Detailed Specification	Data is collected by local authorities through the SDQ. A single summary figure for each child (the total difficulties score), ranging from 0 to 40, is submitted to the Department for Education through the SSDA903 data return. A higher score indicates greater difficulties. The mean of total difficulties score for all looked after children aged between 4 and 16 (inclusive) at the date of their latest assessment, who have been in care for at least 12 months on 31st March is calculated. Average scores have been rounded to one decimal place and have been derived from unrounded numerator and denominator values.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. 95% confidence interval are not calculable.
Chart Notes Local Authority	Rates are not currently available at a local authority district level.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. 95% confidence interval are not calculable.

Chart Notes Inequalities	Rates are not currently available by inequality characteristics within Devon.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator: Alcohol-Related Admissions (narrow definition)

Period: Year to September 2014 ***UPDATED INDICATOR***

RAG Rating	
	Green
A	Amber
	Red

Overview Using the narrow definition from the Public Health Outcomes Framework, there were around 5,000 alcohol-related admissions to hospital for Devon residents between October 2013 and September 2014. The Direct Age Standardised Rate of admissions (639.7 per 100,000) is broadly in line with the regional and national rates but significantly above the local authority comparator group rate. Rates within Devon are highest in Exeter and North Devon. Rates are higher in more deprived areas.

Equalities Alcohol-Related Admission rates vary by age, with the highest rates in older age groups, reflecting the long-term effects of alcohol-use through life. Acute admissions (accidents and poisonings) are most common in young adults, mental health admissions in persons in their 40s and 50s, and admissions for chronic conditions in older age groups. Admission rates are higher for males than females.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 2. Health Improvement

Indicator 2.22 Percentage Offered an NHS Health Check

Period: 2014-15 Q3 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview
66,875 people in Devon have been offered a health check since April 2013. This represents 27.06% of the eligible population (247,160), which is below the South West (29.43%), comparator group (34.23%) and England (33.13%) rates. Within Devon rates are highest in Torridge. Within local CCGs, rates are highest in the South Devon and Torbay localities. The percentage offered continued to rise in Q3 narrowing the gap to other areas.

Equalities
Whilst practices covering areas with below average deprivation have the lowest offered rates, the pattern by deprivation is mixed, with high rates in practices with above average levels of deprivation highlighting that the programme is more established in Torridge, Teignbridge, Exeter and the Exmouth area and also in the least deprived practices.

Domain 2. Health Improvement

Indicator 2.22 Percentage Receiving an NHS Health Check

Period: 2014-15 Q3 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview
32,908 people in Devon received a health check since April 2013. This represents 13.31% of the eligible population (247,160), which is below the South West (13.41%), comparator group (15.29%) and England (15.86%) rates. Within Devon rates are highest in Torridge and Teignbridge. Within local CCGs, rates are highest in the South Devon and Torbay localities. The percentage receiving a health check continued to rise in Q3, narrowing the gap to other areas.

Equalities
The pattern by deprivation is mixed at present, with high rates in areas with above average levels of deprivation highlighting that the programme is more established in Torridge. Rates were also higher in the least deprived practices, whereas rates in the other three practice deprivation quintiles were broadly similar.

Domain 2. Health Improvement

Indicator 2.22 NHS Health Check Uptake Rate

Period: 2014-15 Q3 cumulative ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

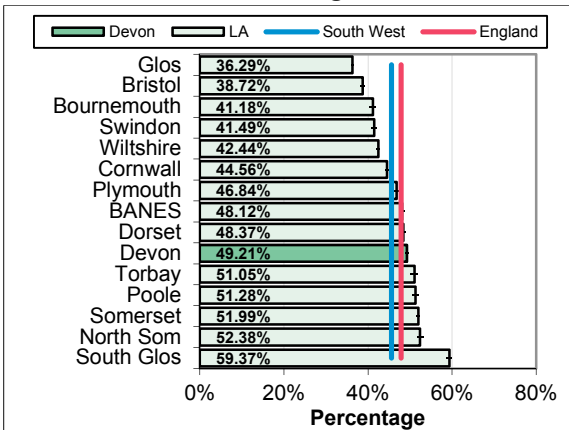

Overview

The uptake rate for NHS health checks in Devon current stands at 49.21%, which is above the South West (45.57%), local authority comparator group (44.67%) rates, and England (47.86%) rates. Within Devon rates are highest in the South Hams and lowest in Exeter and West Devon. Within local CCGs, rates are highest in the South Devon and Torbay localities. The uptake rate has improved over recent quarters.

Equalities

The pattern by deprivation is mixed at present, with high rates in areas with below average levels of deprivation and in the most deprived areas, which is more indicative of variations between different areas of Devon.

PUBLIC HEALTH DEVON OUTCOMES REPORT

Domain 4. Healthcare Public Health

Indicator 4.16 Dementia Diagnosis Rate

Period: December 2014

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview
 In December 2014, 7,295 people in Devon were on a GP register for dementia, compared with an expected prevalence of 13,937, this is a diagnosis rate of 52.3%. Rates in Devon have remained below the South West and England rates. Diagnosis rates have improved in recent years, increasing from 28.0% in 2006-07 and 44.9% in March 2014. The highest rates in Devon are seen in Teignbridge area (58.5%) and are particularly high in Newton Abbot (62.4%).

Equalities
 There are no significant differences in Devon based on area deprivation. Dementia prevalence rates are higher in females. This, coupled with longer life expectancy, means females with dementia outnumber males by more than two to one. Prevalence rates for dementia increase rapidly with age, with one in 1400 affected under the age of 65, compared with more than one in five in those aged 85 and over.

PUBLIC HEALTH DEVON OUTCOMES REPORT INDICATOR SPECIFICATION

Priority 3: Independence in Older Age

Indicator: Dementia Diagnosis Rate

Period: December 2014

Description	Number of persons recorded on a GP Dementia Disease Register as a % of those in the area predicted to have dementia (using age and sex based estimates)
Source	NHS Dementia Prevalence Calculator Primary Care Data Tool, Devon Public Health Intelligence Team (Local GP Practice Deprivation Quintiles)
Update Frequency	Quarterly, typically three to four weeks in arrears
Outcomes Framework	NHS Outcomes Framework Indicator 2.6i, Public Health Outcomes Framework Indicator 4.11 - not yet finalised as new dementia prevalence estimates are currently being devised to inform the frameworks.
Detailed Specification	Numerator is the number of people on a GP practice dementia disease register at the end of the given period and reported through the Quality and Outcomes Framework. Numbers predicted to have dementia apply local GP practice population in quinary age bands to age and sex specific dementia prevalence rates from the 2007 Dementia UK prevalence study. Rate divides the number on the QOF register by the predicted number with dementia to give the percentage diagnosed. GP practice numerators and denominators are aggregated to areas based on location of practice.
Chart Notes South West	Compares Former Primary Care Trusts in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on GP practice attributions. Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).
