

HEALTH AND WELLBEING OUTCOMES REPORT

10TH SEPTEMBER 2015

DEVON HEALTH AND WELLBEING BOARD

FULL VERSION

The Joint Health and Wellbeing Strategy has four priority areas and the selected indicators in this report align to these. Further to this, there are three types of indicators reflecting how the board will address the issue in question. These three types are:

Challenge Indicators – these cover areas where outcomes are poor, where inequalities are widening locally, or areas which are critical to future plans to improve health and wellbeing. The board will monitor these indicators and challenge current processes and practices in lead organisations in these areas.

Monitoring 'Watching Brief' Indicators – these cover areas where local outcomes are positive or where improvements have been made. The role of the board will be to monitor these indicators and intervene should outcomes deteriorate.

Commissioning Improvement Indicators – these are indicators for areas where joint working is required to improve outcomes and where the board will need to play a more active role in coordinating local commissioning.

Joint Health and Wellbeing Strategy indicators are set out in the grid on the next page, grouped against the four Joint Health and Wellbeing Strategy priorities and three indicator types. The outcomes framework they align to is identified within brackets. Given the remit of the board, the Public Health Outcomes Framework, Adult Social Care Outcomes Framework and NHS Outcomes Framework all figure prominently.

There are six main analyses in each individual indicator report:

South West Benchmarking – showing the position of Devon relative to other upper tier or unitary authorities in the South West, the South West rate and the national rate.

Local Authority District – highlighting differences within Devon between local authority districts.

Local Authority Comparator Group – showing Devon's position relative to the national family of peer authorities.

Clinical Commissioning Group and Locality Comparison – highlighting differences within Devon between the Clinical Commissioning Groups and sub localities.

Trend and Future Trajectory – showing change over time on the selected indicator compared to the South West and England, and where available a future trajectory based on local targets or ambitions.

Inequalities – illustrating the extent of inequalities within Devon for the selected indicator. These will typically focus on social deprivation, but may relate to age, sex or other factors as appropriate.

Indicators which have been updated since the last report are marked as:

UPDATED INDICATOR

Any queries on this report should be directed to the Devon Public Health Intelligence Team at publichealthintelligence@devon.gov.uk

Green	G	No major cause for concern in Devon, benchmarking good / on-target

Priority Area Summaries

1. A Focus on Children and Families - Child poverty levels fell between 2011 and 2012. Recorded levels of child development are above the South West and England averages. Rates of smoking at delivery are falling over time and are amongst the lowest in the South West. Conception rates have fallen over time, particularly in more deprived areas. Self-harm admissions in younger people are above the national average.

2. Healthy Lifestyle Choices - Higher levels of physical activity are seen in Devon. Levels of excess weight in children are above average at age 4/5 and below average at age 10/11. The narrow alcohol-related admissions rate is similar to England. Adult smoking rates are below the national average. Mortality rates are falling.

3. Good Health and Wellbeing in Older Age - Clostridium Difficile incidence aligns with South West and national rates. The gap between Devon and the South West and England for the detection of dementia, has narrowed significantly. Devon has relatively low levels of injuries due to falls. A higher proportion feel supported to manage their long-term condition in Devon. Reablement service effectiveness is above average, but recorded coverage is low. Readmission rates are below average but are increasing over time.

4. Strong and Supportive Communities - Suicide rates in Devon are consistent with the national average. There is a smaller gap in life expectancy between the most and least deprived communities in Devon than nationally. Self-reported wellbeing in Devon tends to be better than the national average. The proportion stating that they have as much social contact as they would like is above the national average. Quality of life for carers is in line with the national average. Devon had similar levels of people with learning disabilities in stable and appropriate accommodation than the national average, but lower rates for people with mental health issues.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Children in Poverty

Period: 2012

RAG Rating

	Green
A	Amber
	Red

Overview

15,615 children (12.7%) in Devon live in households dependent on benefits or tax credits, compared with 15.1% in the South West and 19.2% nationally. Child poverty rates in Devon fell between 1999 and 2008 and have dropped further from the South West average over time. Rates increased in 2009 and 2010 before falling slightly in 2011 and 2012. Rates at a district level range from 10.3% in East Devon to 16.0% in Torridge. Rates in the most deprived areas are five times those in the least.

Equalities

Considerable variation exists across Devon communities. Rates of child poverty are higher in younger families due to higher benefit claimant rates and lower incomes in persons in their 20s and 30s. Single parent households, particularly where headed by a female, are also more likely to experience economic poverty, as are children of disabled parents. There are no significant variations by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 1: A Focus on Children and Families

Indicator: Children in Poverty

Period: 2012

Description	Percentage of children (aged 0 to 15) living in households dependent on benefits or tax credits.
Source	HM Revenue and Customs (Personal Tax Credits: Related Statistics - Child Poverty Statistics)
Update Frequency	Annually, around 20 months in arrears (2013 due Autumn 2015)
Outcomes Framework	Public Health Outcomes Framework Indicator 2.01
Detailed Specification	Children living in families in receipt of Child Tax Credit (CTC) whose reported income is less than 60 per cent of the median income or are in receipt of income support (IS) or Income-Based Jobseeker's Allowance (JSA), as a proportion of the total number of children in the area.
Chart Notes South West	Compares Upper Tier / Unitary Local Authorities in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on the geographic areas defined at Lower Super Output Area level www.devonhealthandwellbeing.org.uk/library/maps . Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares areas within Devon based on area deprivation. National deprivation quintiles from the 2010 Indices of Deprivation (Index of Multiple Deprivation) used.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Early Years Foundation Score

Period: 2013-14 (School Year)

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013-14 67% in Devon achieved the expected level in the Early Years Foundation Stage, which was significantly above the South West (61%), local authority comparator group (60%) and England (58%) rates. Within Devon this varied from 58.7% in Mid Devon to 70.8% in the South Hams. Rates increased from 64% in 2012-13.

Equalities

The percentage achieved is lower in the more deprived areas in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Smoking at Time of Delivery

Period: 2013-14

RAG Rating

G Green

Amber

Red

Overview

In the year 2013-14, 847 mothers were smoking at time of delivery in Devon. This represents 12.2% of all mothers in Devon, compared with 13.0% in the South West, and 12.0% in England. Nationally data are no longer reported on a local authority basis but on a CCG basis. The higher Devon rate in 2013-14 is influenced by higher rates in Torbay and Plymouth. Within Devon the lowest rates were in East Devon (6.3%), and the highest in Torridge (13.2%). Rates have fallen over recent years.

Equalities

Whilst overall rates in Devon are the lowest in the South West, there is a strong inequalities gradient. Rates in the most deprived areas (25.7%) are almost five times higher than those in the least deprived areas (5.4%). Smoking at time of delivery varies by age with younger mothers in their teens and twenties much more likely to smoke than mothers in their thirties and forties.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

INDICATOR SPECIFICATION

Priority 1: A Focus on Children and Families

Indicator: Smoking at Time of Delivery

Period: 2013-14

Description	Number of women who currently smoke at time of delivery per 100 maternities.
Source	The Health and Social Care Information Centre, Lifestyle Statistics
Update Frequency	Annually - typically eight months in arrears
Outcomes Framework	Public Health Outcomes Framework Indicator 2.03
Detailed Specification	Number of women known to smoke at time of delivery. Numerator counts for areas are based on all women resident within the PCT's boundary known to smoke. Denominator counts for areas are based on all women resident within the PCT's boundary who gave birth in the period. Data collected from Health and Social Care Information Centre's return on Smoking Status At Time of Delivery. This information has been collected using the Health and Social Care Information Centre's (HSCIC's) Omnibus system, a web based system set up to collect performance and other central returns directly from the NHS.
Chart Notes South West	Compares Primary Care Trust areas in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Rates are not currently available at a Clinical Commissioning Group and locality level.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares rates in the wards with the highest teenage conception areas with the Devon average.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Teenage Conception Rate

Period: 2014 Q2 Rolling Year ***UPDATED INDICATOR***

RAG Rating

G	Green
	Amber
	Red

Overview

There were 229 conceptions in Devon between July 2013 and June 2014 for females aged under 18, with around half leading to a birth. The latest annual conception rate is 18.5 per 1,000 females compared with 19.6 for the South West, 19.5 for the local authority comparator group and 23.4 for England. Higher rates are seen in Exeter, Mid Devon and Teignbridge but the differences are not statistically significant.

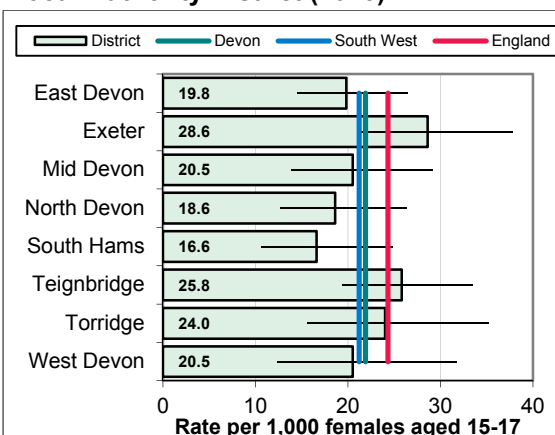

Equalities

There is a very clear link between area deprivation and teenage conception, with higher rates in the most deprived areas both locally and nationally, although rates have fallen more rapidly in the most deprived wards in recent years. Most teenage conceptions occur at the age of 17, and there are only a small proportion under the age of 16 (around 50 to 60 per annum), with less than 10 under 16 births per annum.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 1: A Focus on Children and Families

Indicator: Hospital Admissions for Self-Harm, Aged 10 to 24

Period: 2013-14

UPDATED INDICATOR

RAG Rating

	Green
	Amber
R	Red

Overview

There were 653 hospital admissions for self-harm in persons aged 10 to 24 in Devon in 2013-14. The rate per 100,000 in Devon was 501.8, which is below the South West rate (520.8), but above the local authority comparator group (463.1) and England (412.1) rates. Admission rates increased from 376.6 in 2007-08 to 501.8 in 2013-14. Within Devon rates were highest in Exeter, and lowest in the South Hams.

Equalities

Rates of hospital admission for self-harm are three times higher in females than males and the gap has widened in recent years. Within the 10 to 24 age group admission rates were highest in those aged 15 to 19 (775.8). Admission rates also are higher in more deprived areas, with a rate of 1031.1 in the most deprived areas compared with 427.8 in the least deprived areas in 2013-14.

This is based on the geographic areas defined at Lower Super Output Area level www.devonhealthandwellbeing.org.uk/library/maps . Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate over time. South West region and England rates not available as historical information has been published for the indicator.
Chart Notes Inequalities	Compares rates within Devon by sex.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Proportion of Physically Active Adults

Period: 2014

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

60.3% of adults in Devon were physically active for at least 150 minutes per week in 2014. This is broadly in line with South West (59.4%), and comparator group (58.9%) and significantly above the national (57.0%) rates. The differences between the districts in Devon were not statistically significant. Levels of physical activity decreased slightly from 60.9% in 2013 to 60.3% in 2014.

Equalities

Local breakdowns by deprivation or equality characteristics are not available. National results from the Active People survey highlight that physical activity rates are higher in less deprived areas and professional groups. Participation is also higher in males and younger age groups. There are no significant differences by ethnicity. Activity rates are significantly lower in people with limiting long-term health problems.

Chart Notes Inequalities	Rates cannot currently be calculated at a local level.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Excess Weight in Four / Five Year Olds

Period: 2013-14 (School Year)

RAG Rating

	Green
A	Amber
	Red

Overview

This measure of 'excess weight' covers children classified as overweight or very overweight. In reception year (aged four or five) 23.4% of pupils in Devon were recorded in the excess weight category, compared to 23.5% for the South West (22.9%), 22.3% for the local authority comparator group, and 22.5% for England. Within Devon, Exeter (27.0%), and Torridge (25.6%) were significantly above the national rate. Rates decreased on 2013-14 levels.

Equalities

Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Excess Weight in 10 / 11 Year Olds

Period: 2013-14 (School Year)

RAG Rating

	Green
A	Amber
	Red

Overview

This measure of 'excess weight' covers children classified as overweight or very overweight. In year six (aged 10 or 11) 30.3% of pupils in Devon were recorded in the excess weight category, which was below the South West (31.0%), local authority comparator group (30.8%), and England (33.5%) rates. The rates in the East Devon, North Devon and the South Hams were significantly below the South West and national rates. Rates have remained fairly level over recent years.

Equalities

Local results by deprivation and other criteria have not yet been released. Previous results for Devon that whilst obesity rates were significantly higher in more deprived areas, the difference for the combined excess weight were not statistically significant. Levels of excess weight were higher in boys than girls. No significant differences were observed by ethnic group in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Alcohol-Related Admissions (narrow definition)

Period: 2014-15 Provisional ***UPDATED INDICATOR***

RAG Rating

	Green
A	Amber
	Red

Overview

Using the narrow definition from the Public Health Outcomes Framework, there were around 5,000 alcohol-related admissions to hospital for Devon residents in 2014-15. The Direct Age Standardised Rate of admissions (636.5 per 100,000) is broadly in line with the regional and national rates but significantly above the local authority comparator group rate. Rates within Devon are highest in Exeter, North Devon and Torridge. Rates are higher in more deprived areas.

Equalities

Alcohol-Related Admission rates vary by age, with the highest rates in older age groups, reflecting the long-term effects of alcohol-use through life. Acute admissions (accidents and poisonings) are most common in young adults, mental health admissions in persons in their 40s and 50s, and admissions for chronic conditions in older age groups. Admission rates are higher for males than females.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Adult Smoking Prevalence

Period: 2013

RAG Rating

G	Green
	Amber
	Red

Overview

The latest figures from the Integrated Household Survey suggest that 16.4% of the adult population in Devon smoke. This is below the South West (17.3%), local authority comparator group (16.7%) and England rate (18.4%). This is also below the 2011 (19.5%) and 2012 (16.8%) although the difference is not statistically significant due to a relatively small sample size. Variations observed at a local authority district level were not statistically significant.

Equalities

Smoking rates in Devon are higher in people working in routine and manual occupations (24.6%). Levels of smoking are highest in the 16 to 29 age group, and are higher in males than females, although it should be noted that rates have been slower to fall in females. Adults smoking in the household greatly increases the likelihood of children taking up smoking at age 16.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 2: Healthy Lifestyle Choices

Indicator: Under 75 Mortality Rate - All Cancers

Period: 2011-13

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013, there were 942 deaths due to cancer in under 75s, with an direct age standardised rate of 130.9 per 100,000 for 2011-13. The Devon rate in 2011-13 was below the South West (134.3), local authority comparator group (134.3), and England (144.4) rates. Within the county, rates are highest in North Devon (147.4). Mortality rates by year have fallen from 157.2 in 2001-03. Mortality rates are higher in more deprived areas, although the health inequality gap has decreased over recent years.

Equalities

Mortality from cancer increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group. Mortality rates from cancer are around 20% higher in males than females in England. In terms of ethnicity, Cancer Research UK suggests higher mortality rates in white groups, although survival rates for breast cancer are lower in Asian and Black ethnic groups.

Priority 2: Healthy Lifestyle Choices

Indicator: Under 75 Mortality Rate - All Circulatory Diseases

Period: 2011-13

RAG Rating

G	Green
	Amber
	Red

Overview

In 2013, there were 500 circulatory deaths in under 75s, with an direct age standardised rate of 63.8 per 100,000 for 2011-13. The Devon rate in 2011-13 was below the South West (67.1), local authority comparator group (66.7) and England (78.2) rates. Within the county, rates are highest in Exeter and Torridge. Mortality rates fell from 107.7 in 2001-03. Whilst rates have fallen more quickly in areas of above average deprivation, the gap persisted for those in the most deprived areas.

Equalities

Mortality from circulatory disease increases rapidly with age, with the highest mortality rates in under 75s in the 65 to 74 age group, and very few deaths in persons aged under 40. In Devon mortality rates are 2.5 times higher in males than females. In terms of ethnicity, the British Heart Foundation highlight that whilst risks did not vary considerably by ethnic group for females, white males were at higher risk.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Incidence of Clostridium Difficile

Period: 2014-15

UPDATED INDICATOR

RAG Rating

	Green
A	Amber
	Red

Overview

There were 354 cases of Clostridium Difficile in 2014-15 in Devon, Plymouth and Torbay. The incidence rate per 100,000 in Devon (30.8) was not significantly different from the South West (28.5), local authority comparator group (27.4) and England (26.3) rates. Infection rates increased slightly on 2013-14 levels. Within Devon infection highs were higher in the South Devon and Torbay CCG (48.7) and lower in Northern Eastern and Western Devon CCG (25.2).

Equalities

Incidence of Clostridium Difficile increases significantly with age, with a rate in 2012-13 of 9.7 per 100,000 in those aged 40 to 59 compared to 282.0 per 100,000 for those aged 80 and over. This is a consequence of higher hospital admissions in these age groups, a greater likelihood of living in a communal establishment (care homes) and poorer general health. Rates are also higher in females and in more

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Injuries Due to Falls

Period: 2013-14

RAG Rating

G	Green
	Amber
	Red

Overview

There were 3,518 admissions due to falls in 2013-14 in Devon for people aged 65 and over. The age standardised rate per 100,000 was 1766.1 in Devon, which is below the South West (1950.3), local authority comparator group (1905.3) and England (2064.3) rates. The rate in Devon is the second lowest in the South West. Within Devon rates were significantly lower in Mid Devon (1520.8). Rates have increased on 2012-13 levels.

Equalities

Age standardised admission rates have remained consistently higher in the most deprived deprivation quintile. Whilst the gap narrowed in 2012-13, the rate in the most deprived areas (2233.1) was still 47% higher than the least deprived areas (1523.9). Rates increase sharply with age with an age-specific rate of 484.2 for persons aged 65 to 69, compared with 6146.8 for those aged 85 and over.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Dementia Diagnosis Rate

Period: 2014-15

RAG Rating

	Green
A	Amber
	Red

Overview

In March 2015, 7,838 people in Devon were on a GP register for dementia, compared with an expected prevalence of 13,864, this is a diagnosis rate of 56.5%. The gap between Devon and the South West and England has narrowed considerably over the last two years. Diagnosis rates increased from 28.0% in 2006-07 and 44.9% in March 2014. The highest rates in Devon are seen in Exeter area (62.9%) and are particularly high in the Coastal locality covering Teignmouth and Dawlish (66.1%).

Equalities

There are no significant differences in Devon based on area deprivation. Dementia prevalence rates are higher in females. This, coupled with longer life expectancy, means females with dementia outnumber males by more than two to one. Prevalence rates for dementia increase rapidly with age, with one in 1400 affected under the age of 65, compared with more than one in five in those aged 85 and over.

Chart Notes Inequalities	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Feel Supported to Manage Own Condition

Period: 2014-15 Q3-Q4

UPDATED INDICATOR

RAG Rating

G	Green
	Amber
	Red

Overview

In Devon during late 2014-15, 68.9% of people with a long-term condition in the GP survey, felt they had enough support to manage their own condition. This is significantly higher than national (63.3%), South West (65.6%) and local authority comparator group (64.2%) rates. Rates in NEW Devon CCG (67.8%) and South Devon and Torbay CCG (67.0%) were broadly similar, and highest in the Mid Devon locality (72.3%). Rates have also increased over recent years.

Equalities

There was no clear relationship between feeling supported to manage their own condition and deprivation. National results reveal the older age groups (85 and over, 69.2%) feel better supported than younger age groups (18 to 24, 58.2%), males (65.3%) feel better supported than females (62.0%), and minority ethnic groups feel less well supported.

INDICATOR SPECIFICATION

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Feel Supported to Manage Own Condition

Period: 2014-15 Q3-Q4

Description	Weighted percentage of people feeling supported to manage their condition.
Source	NHS GP Patient Survey
Update Frequency	Two times a year, next update due January 2016.
Outcomes Framework	NHS Outcomes Framework Indicator 2.1
Detailed Specification	Numerator: For people who answer yes to the Question 30 "Do you have a long-standing health condition", the numerator is the total number of 'Yes, definitely' or 'Yes, to some extent' answers to GPPS Question 32: In the last 6 months, have you had enough support from local services or organisations to help you manage your long-term condition(s)? Please think about all services and organisations, not just health services • Yes, definitely • Yes, to some extent • No • I have not needed such support • Don't know/can't say. Responses weighted according to the following 0-100 scale: "No" = 0 "Yes, to some extent" = 50 "Yes, definitely" = 100.
Chart Notes South West	Compares Former Primary Care Trusts in the South West Region. Error bar is 95% confidence interval.
Chart Notes Local Authority	Compares Local Authority Districts in the Devon County Council area. Error bar is 95% confidence interval.
Chart Notes Comparator	Compares Devon to similar upper tier / unitary local authorities using the 15 closest comparator councils from the Institute of Public Finance (IPF) statistical neighbours. Error bar is 95% confidence interval.
Chart Notes CCG/Locality	Displays rates for the two Clinical Commissioning Groups in the wider Devon area, their localities, and their sub-localities. This is based on GP practice attributions. Error bar is 95% confidence interval.
Chart Notes Trend	Compares Devon rate with South West region and England over time.
Chart Notes Inequalities	Compares areas within Devon based on local GP practice deprivation quintiles. Calculated using the 2010 Indices of Deprivation (Index of Multiple Deprivation).

Indicator: Re-ablement Services (Effectiveness)

Period: 2013-14

RAG Rating

G Green

Amber

Red

Overview

In 2013-14, reablement services were effective for 89.8% of older people who received the service in Devon, which was significantly higher than the South West (79.4%), local authority comparator group (82.6%) and England (81.9%). The rate increased from 87.9% in 2012-13. Within Devon the highest rates were seen in Exeter (96.9%).

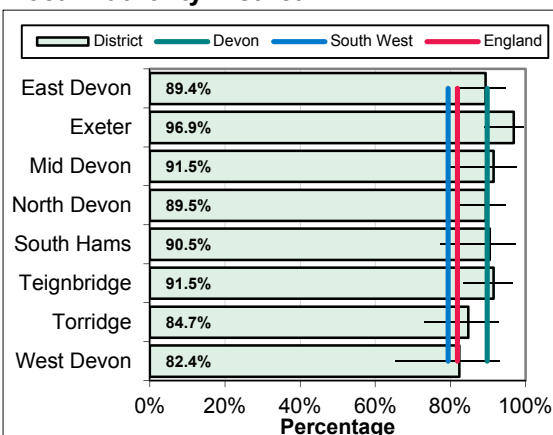

Equalities

There is no significant link between the effectiveness of reablement services and deprivation levels in Devon.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 3: Good Health and Wellbeing in Older Age

Indicator: Readmissions to Hospital Within 30 Days

Period: 2011-12

RAG Rating

	Green
A	Amber
	Red

Overview

In Devon in 2011-12, 10.29% of patients discharged after an emergency admission were readmitted within 30 days. This is significantly below the South West (10.93%), local authority comparator group (10.95%) and England (11.78%) rates. The rate in Devon was the third lowest in the South West and the lowest in the local authority comparator group. Exeter (11.72%) had a readmission rate above the South West and Devon rate. Readmission rates have increased over time, but slowed recently.

Equalities

There is no local data currently available on the pattern by deprivation, age, sex and other factors, although reports are in development. National data highlights higher readmission rates in more deprived areas, ranging from 13.05% in the most deprived group to 10.53% in the least deprived group. Readmission rates are higher amongst males (12.13%, compared with 11.46% for females).

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Suicide Rate

Period: 2011-13

RAG Rating

	Green
A	Amber
	Red

Overview

Around 65 deaths per annum are registered as suicide or injury undetermined (open verdict), with an direct age standardised rate of 10.4 per 100,000. This was above the South West (10.1), local authority comparator group (9.5) and England (8.8) rates. Within the county, rates are similar between districts, with no significantly higher rates. Whilst year-on-year variations are seen due to the small numbers involved, rates in Devon have typically remained around or slightly above the national rate.

Equalities

There are no significant differences in suicide rates based on area deprivation in Devon. Differences by sex are notable, and tend to be low and stable for females and higher and more variable in males. Suicide rates are highest for people in the 40s and 50s and are relatively low for persons in their teens and 20s.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Male Life Expectancy Gap

Period: 2011 to 2013

RAG Rating

G	Green
	Amber
	Red

Overview

The Slope Index of Inequality compares life expectancy in the most deprived and least deprived communities within an area's population, revealing the gap in life expectancy in years. For males in Devon the gap is 5.2 years which is significantly lower than the gaps for the South West (7.5), the local authority comparator group (7.2), and England (8.4).

Equalities

As the slope index of inequality compare the most and least deprived communities within an area's population, the smaller gap seen is partly a product of less severe social inequalities compared to other areas. The gap is more notable at the extremes with a 15 year gap in life expectancy at an electoral ward level. The life expectancy gap is much larger for males than females.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Self-Reported Wellbeing (low happiness score %)

Period: 2013-14

RAG Rating

G	Green
	Amber
	Red

Overview

Low happiness score is one of four self-reported wellbeing measures in the Public Health Outcomes Framework, with others covering life satisfaction, feeling worthwhile and anxiety. Within Devon, 8.51% of the population had a low happiness score (ranked 0-4 on a scale of 10) on the index compared with 9.71% for the South West, 8.55% in the local authority comparator group and 9.71% in England overall. The percentage with a low happiness score is falling over time.

Equalities

No local information is available based on area deprivation or other characteristics. National findings highlight that self-reported wellbeing tends to be poorer in more deprived areas. There is a notable pattern by age with younger people and older people with higher levels of wellbeing than people in their 40s and 50s (known as the U shaped curve of happiness).

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Social Contentedness

Period: 2013-14

RAG Rating

G Green

Amber

Red

Overview

47.5% of social care users surveyed in Devon in 2013-14 reported being satisfied with their social situation. This was significantly above South West (44.3%), local authority comparator group (45.2%) and England (44.2%) rates. Within Devon whilst there is some variation in responses at district level, smaller sample sizes mean the differences are not statistically significant. Rates increased significantly on 2012-13 levels.

Equalities

Female social care users in Devon reported being more satisfied with their social situation than male social care users. Social care users with Learning Disabilities reported being the most satisfied with their level of social contact compared with other client groups.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Stable/Appropriate Accommodation (Learning Dis.)

Period: 2013-14

RAG Rating

Green

A Amber

Red

Overview

The nature of accommodation for people with learning disabilities has a strong impact on their safety and overall quality of life and the risk of social exclusion. In 2013-14 74.0% of adults with a learning disability in Devon (known to the council) were living in their own home or with their family, compared with 72.7% in the South West, 72.1% in the local authority comparator group and 74.8% nationally. Rates increased on 2012-13 levels (69.1%).

Equalities

A higher proportion of younger adults (18-30) with a learning disability are in stable and suitable accommodation in Devon, compared to 31-64 year olds.

DEVON HEALTH AND WELLBEING OUTCOMES REPORT

Priority 4: Strong and Supportive Communities

Indicator: Stable/Appropriate Accommodation (Mental Health)

Period: 2013-14

RAG Rating

G	Green
	Amber
	Red

Overview

Stable and appropriate accommodation is closely linked to improving safety and reducing the risk of social exclusion. In 2013-14 54.5% of adults in contact with a secondary mental health service in Devon were in stable and suitable accommodation. This is higher than the South West (50.3%) and local authority comparator group (45.2%), but below the England rate (60.9%). Rates have decreased in Devon over recent years.
